Allegory An Odyssey In Time Space:

Allegory Will A. Parker, Carl J. Eberhard, 1975 *Bigger Than Blockbusters* James Roman, 2009-02-17 Whether it's the hum drum existence of Marion Crane and her illicit love affair the psychotic antics of Norman Bates the sudden irrational migration of birds a crop duster swooping down on Roger Thornhill in the middle of nowhere or Vincent Vega and Mia Wallace's unforgettable dance at Jack Rabbit Slim's they are all cinematic moments that forever changed the psyche and viewing experience of American audiences *Bigger Than Blockbusters* Movies That Defined America tells the stories behind the most significant and influential films in American culture movies that have had a profound influence on the literary cinematic and popular culture of our time Arranged chronologically the volume gives readers an opportunity to place the films within the context of the social and cultural historic dynamic of the time making this an ideal source for student papers and reports Each entry includes the filmmaker actors release information a synopsis of the film critics reviews awards current availability and then background on the making of the film in an artistic economic and technological context Spanning all genres including horror and drama adventure comedy musicals science fiction and more this volume is loaded with enough trivia and factoids to satisfy even the most die hard movie buff Also included are other Greatest Films compilations from the National Society of Film Critics and noteworthy sources for comparative purposes Guaranteed to inspire forays into film favorites as well as some very lively debate this resource is essential reading for film lovers and students alike **Stanley Kubrick's 2001: A Space Odyssey** Robert Kolker, 2006-03-23 Almost all students have seen 2001 but virtually none understand its inheritance its complexities and certainly not its ironies The essays in this collection commissioned from a wide variety of scholars examine in detail various possible readings of the film and its historical context They also examine the film as a genre piece as the summa of science fiction that simultaneously looks back on the science fiction conventions of the past Kubrick began thinking of making a science fiction film during the genre's heyday in the fifties rethinks the convention in light of the time of the film's creation and in turn changes the look and meaning of the genre that it revived which now remains as prominent as it was almost four decades ago Constructed out of its director's particular intellectual curiosity his visual style and his particular notions of the place of human agency in the world and in this case the universe 2001 is like all of his films more than it appears and it keeps revealing more the more it is seen Though their backgrounds and disciplines differ the authors of this essay collection are united by a talent for vigorous yet incisive writing that cleaves closely to the text to the film itself with its contextual and intrinsic complexities granting readers privileged access to Kubrick's formidable intricate classic work of science fiction *Do Metaphors Dream of Literal Sleep?* Seo-Young Chu, 2011-01-15 In culture and scholarship science fictional worlds are perceived as unrealistic and altogether imaginary Seo Young Chu offers a bold challenge to this perception of the genre arguing instead that science fiction is a form of high intensity realism capable of representing non imaginary objects that elude more traditional realist modes of representation

Powered by lyric forces that allow it to transcend the dichotomy between the literal and the figurative science fiction has the capacity to accommodate objects of representation that are themselves neither entirely figurative nor entirely literal in nature Chu explores the globalized world cyberspace war trauma the Korean concept of han and the rights of robots all as referents for which she locates science fictional representations in poems novels music films visual pieces and other works ranging within and without previous demarcations of the science fiction genre In showing the divide between realism and science fiction to be illusory Do Metaphors Dream of Literal Sleep sheds new light on the value of science fiction as an aesthetic and philosophical resource one that matters more and more as our everyday realities grow increasingly resistant to straightforward representation

After Kubrick Jeremi Szaniawski, 2020-02-20 Taking at its starting point the idea that Kubrick's cinema has constituted an intellectual cerebral and philosophical maze in which many filmmakers as well as thinkers and a substantial fringe of the general public have gotten lost at one point or another this collection looks at the legacy of Kubrick's films in the 21st century The main avenues investigated are as follows a look at Kubrick's influence on his most illustrious followers Paul Thomas Anderson the Coen Brothers Christopher Nolan Ridley Scott and Lars von Trier to name a few Kubrick in critical reception Kubrick in stylistic camera movements set designs music thematic artificial intelligence new frontiers large and small aesthetic the question of genre pastiche stereoscopy and political terms paranoia democracy and secret societies conspiracy theories The contributions coalesce around the concept of a Kubrickian substrate rich and complex which permeates our Western cultural landscape very much to this day informing and sometimes announcing reflecting it in twisted ways 21 years after the director's death

The Ascendancy of the Scientific Dictatorship, *Fuel* Karen Pinkus, 2016-11-01 *Fuel* is an idiosyncratic speculative dictionary of fuels real and imagined historical and futuristic hopeless and utopian Drawing on literature film and scientific treatises most produced long before climate change was in circulation *Fuel* argues for a distinction between energy a system of power and fuel a substance which can be thought of as potentiality as it endeavors to undo the dream that we can simply switch to renewables and all will be golden From Air to Zyklon B entries in this unusual dictionary include Algae Clathrates Dilithium Fleece Goats Theology Whale Oil and many many more The tone of the entries ranges as widely as the topics from historical anecdotes the Ford Fiesta boozemobile to eccentric readings of the classics of energy lit *Germinal* and *Oil* from literary observations a high octane *Odyssey* to excursions into literary theory The dictionary draws from an eccentric canon including works by Jules Verne George Eliot's *Silas Marner* Paolo Bacigalupi's *Windup Girl* and the Tom Cruise vehicle *Oblivion* among others A message from this ambitious project is that energy can be understood as a heterogeneous set of self-mystifying systems or machines that block access to thought as they fascinate us Fuels emerge as more primal elements that the audience can grasp at various points along the way to consumption combustion This dictionary can help scramble our thinking about fuel not in order to demonize energy and not in order to create a new hierarchy in which certain renewables take over from fossil fuels but instead to open

up potential ways of interacting with real and imaginary substances by wrenching them out of narrative and placing them into an idiosyncratic dictionary to be applied by readers into new narratives

Tradition and Innovation in Hellenistic Poetry Marco Fantuzzi, Richard Hunter, 2005-01-13 Hellenistic poets of the third and second centuries BC were concerned with the need both to mark their continuity with the classical past and to demonstrate their independence from it In this revised and expanded translation of *Muse e modelli la poesia ellenistica da Alessandro Magno ad Augusto* Greek poetry of the third and second centuries BC and its reception and influence at Rome are explored allowing both sides of this literary practice to be appreciated Genres as diverse as epic and epigram are considered from a historical perspective in the full range of their deep level structures providing a different perspective on the poetry and its influence at Rome Some of the most famous poetry of the age such as Callimachus *Aitia* and Apollonius *Argonautica* is examined In addition full attention is paid to the poetry of encomium in particular the newly published epigrams of Posidippus and Hellenistic poetics notably Philodemus
