middle voice in human language which receives grammatical instantiation in many languages The author claims there is a semantic property crucial to the nature of the middle which she terms relative elaboration of events that serves as a parameter along which the reflexive and the middle can be situated as semantic categories intermediate in transitivity between one participant and two participant events and which differentiates reflexive and middle from one another In this area most analyses deal with one language and or are limited to Indo European languages This work deals with a subset of middle marking languages that was chosen so as to observe the highest possible number of different middle systems showing significant independent diachronic development
