Innovating Energy Access for Remote Areas: Discovering Untapped Resources Schäfer, Martina,Kammen, Daniel,Kebir, Noara,Philipp, Daniel,2015-02-16 This volume centers on the idea that innovative approaches for energy access can work with previously

underutilized or unrecognized resources as this may lead to circumstances for the development of successful and sustainable energy programs. Such untapped resources may be seen in the discovering of synergies in areas such as pre-existing service infrastructures, supply chain and value chain management, natural resource availability, financing schemes and leapfrog technologies. Additionally, decentralized approaches can contribute to climate change adaptation measures and increase resiliency for vulnerable communities. Of course, small-scale solutions have clear limitations in regard to global climate and it is important to consider how far they can extend and aggregate impact. This book assembles a selection of articles collected from the 2014 Energy Access Conference at UC Berkeley aiming to consider technical, financial, human, institutional and natural resource capital.

Im Fokus der Konferenz: Innovating Energy Access for Remote Areas. Discovering Untapped Resources, die vom 10. bis zum 12. April 2014 an der University of California stattfand, war der Zugang zu moderner Energieversorgung in strukturschwachen Regionen. Dieser Tagungsband trägt eine Reihe von innovativen Ansätzen zusammen, die auf der Konferenz diskutiert wurden. In den Beiträgen spiegeln sich aktuelle Konzepte, Theorien, Methoden und Techniken im Bereich der dezentralen Energieversorgung. Im Mittelpunkt vieler Beiträge steht die Frage, wie sich vormals ungenutzte oder unbekannte lokale Ressourcen nutzbar machen lassen. Neue Potentiale ergeben sich aus Synergien zwischen supply and value, innovation, neuen Finanzierungsansätzen und der Nutzung sogenannter leapfrog technologies. Die Beiträge zeigen, wie dezentrale Ansätze und kleinteilige lokale Lösungen zur Bekämpfung des Klimawandels und die Anpassung an seine Folgen beitragen und die Resilienz gefährdeter Gemeinschaften stärken können.

Biodiesel Fuels Based on Edible and Nonedible Feedstocks, Wastes, and Algae Ozcan Konur, 2021-05-05. This second volume of the Handbook of Biodiesel and Petrodiesel Fuels presents a representative sample of the population papers in the field of feedstock-specific biodiesel fuels. The research on feedstocks for biodiesel fuels has first focused on the edible oils as first-generation biodiesel fuels. However, the public concerns about the competition with foods based on these feedstocks and adverse impact on the ecological diversity and deforestation have resulted in the exploration of nonedible oil-based biodiesel fuels as second-generation biodiesel fuels in the first instance. Due to the ecological and cost benefits of treating wastes, waste oil-based biodiesel fuels as third-generation biodiesel fuels have emerged. Furthermore, following a series of influential review papers, the research has focused on the algal oil-based biodiesel fuels in recent years. Since the cost of feedstocks in general constitutes 85% of the total biodiesel production costs, the research focused more on improving biomass and lipid productivity in these research fields. Furthermore, since water, CO₂ and nutrients, primarily N and P, have been major ingredients for the algal biomass and lipid production, the research has also intensified in the use of wastewaters and flue gases for algal biomass production to reduce the ecological burdens and the production costs. Part 1 presents a representative sample of the population papers in the field of edible oil-based biodiesel fuels, covering major research fronts. It covers soybean oil-based biodiesel fuels, palm oil-based biodiesel fuels and rapeseed oil-based biodiesel fuels as case studies, besides an overview paper. Part 2 presents a representative sample of

the population papers in the field of nonedible oil based biodiesel fuels covering major research fronts It covers Jatropha oil based biodiesel fuels polanga oil based biodiesel fuels and moringa oil based biodiesel fuels as case studies besides an overview paper Part 3 presents a representative sample of the population papers in the field of waste oil based biodiesel fuels covering major research fronts It covers wastewater sludge based biodiesel fuels waste cooking oil based biodiesel fuels and microbial oil based biodiesel fuels as case studies besides an overview paper Part 4 presents a representative sample of the population papers in the field of algal oil based biodiesel fuels covering major research fronts It covers algal biomass production in general algal biomass production in wastewaters algal lipid production hydrothermal liquefaction of algal biomass algal lipid extraction and algal biodiesel production besides an overview paper This book will be useful to academics and professionals in the fields of Energy Fuels Chemical Engineering Physical Chemistry Biotechnology and Applied Microbiology Environmental Sciences and Thermodynamics Ozcan Konur is both a materials scientist and social scientist by training He has published around 200 journal papers book chapters and conference papers He has focused on the bioenergy and biofuels in recent years In 2018 he edited Bioenergy and Biofuels that brought together the work of over 30 experts in their respective field He also edited Handbook of Algal Science Technology and Medicine with a strong section on the algal biofuels in 2020
