Aspect Eventuality Types And Nominal Reference:

Aspect, Eventuality Types, and Nominal Reference Hana Filip, 1999 First Published in 1999 Routledge is an imprint of Taylor Francis an informa company **Aspect and Valency in Nominals** Maria Bloch-Trojnar, Anna Malicka-Kleparska, 2017-05-22 This book contributes to the recent theoretical developments in the area of mutual interactions of valency and aspect as expressed in different types of verb related nominal structures nominalizations and synthetic compounds A wide range of data from Slavic Hellenic Germanic Romance and Semitic languages provides an empirical testing ground for competing theoretical explanations couched in the lexicalist and construction based frameworks

The Oxford Handbook of Tense and Aspect Robert I. Binnick, 2012-06-14 This Handbook is a comprehensive authoritative and accessible guide to the topics and theories that current form the front line of research into tense aspect and related areas *Theoretical and Crosslinguistic Approaches to the Semantics of Aspect* Susan D. Rothstein, 2008-03-20 The papers in this volume investigate the semantics of aspect from both a theoretical and a crosslinguistic point of view in a wide range of languages from a number of different language families The papers are all informed by the belief that a thorough exposure to the expression of aspect crosslinguistically is crucial for progress in understanding how the semantics of aspect works and what the semantic basis of aspectual distinctions is The languages discussed include Russian English Dutch Hebrew Mandarin Japanese and Kalaallisut The issues discussed in this volume include the centrality of measuring and counting in an understanding of telicity the importance of the singular plural distinction in the study of aspect the importance of homogeneity as a property of event types the flexibility of lexical classes and the interaction between expressions of aspect and the particular morphosyntactic structure of a language Parts of a Whole Lucas Champollion, 2017-03-09 This book uses mathematical models of language to explain why there are certain gaps in language things that we might expect to be able to say but can't For instance why can we say I ran for five minutes but not I ran all the way to the store for five minutes Why is five pounds of books acceptable but five pounds of book not acceptable What prevents us from saying sixty degrees of water to express the temperature of the water in a swimming pool when sixty inches of water can express its depth And why can we not say all the ants in my kitchen are numerous The constraints on these constructions involve concepts that are generally studied separately aspect plural and mass reference measurement and distributivity In this book Lucas Champollion provides a unified perspective on these domains connects them formally within the framework of algebraic semantics and mereology and uses this connection to transfer insights across unrelated bodies of literature and formulate a single constraint that explains each of the judgments above **Language in its multifarious aspects** Petr Sgall, 2006-04-01 This exceptional book of selected essays by the leading Czech linguist and member of the Prague Linguistic Circle contains 26 essays in English and 4 in German It presents the wide scope of Sgall's interest and in six parts introduces the main spheres of author's interest the first part of the book deals with general and theoretical questions the second

contains Sgall's contribution to syntax the third covers the functional sentence perspective the fourth sentences and discourse the fifth language typology and the last part covers speech and writing

Explorations of Phase Theory: Features and Arguments Kleanthes K. Grohmann, 2009-02-26 This is the first volume dedicated to the study of formal features and the expression of arguments within Phase Theory the latest model of syntactic theorizing within the Minimalist Program The collection addresses the nature of formal features and their role in the syntactic computation as well as checking mechanisms and configurations It also investigates theoretical issues underlying the nature of syntactic arguments and their licensing argument structure at large and specific grammatical operations involving arguments abstract and morphological case empty elements passivization negation and aspect The chapters presented in this volume provide case studies from several typologically unrelated languages Apart from novel analyses of new as well as well known facts the contributions also provide interesting aspects of and challenges for Phase Theory in general by critically exploring a number of theoretical extensions proposing new syntactic mechanisms and sharpening our tools for linguistic analysis

The Routledge Handbook of Second Language Acquisition, Morphosyntax, and Semantics Tania Ionin, Silvina Montrul, Roumyana Slabakova, 2024-03-11 This handbook provides innovative and comprehensive coverage of research on the second language acquisition SLA of morphosyntax semantics and the interface between the two Organized by grammatical topic the chapters are written by experts from formal and functional perspectives in the SLA of morphosyntax and semantics providing in depth yet accessible coverage of these areas All chapters highlight the theoretical underpinnings of much work in SLA and their links to theoretical syntax and semantics making comparisons to other populations including child language acquirers bilinguals and heritage speakers links to first language acquisition and bilingualism dedicating a portion of each chapter to the research methods used to investigate the linguistic phenomenon in question links to psycholinguistics and experimental linguistics and where relevant including intervention studies on the phenomenon in question links to applied linguistics The volume will be indispensable to SLA researchers and students who work on any aspect of the SLA of morphosyntax or semantics With its coverage of a variety of methodologies and comparisons to other populations such as child language acquirers early bilinguals heritage speakers and monolingual adults the handbook is expected to also be of much interest to linguists who work in psycholinguistics first language acquisition and bilingualism

Tense, Aspect and Action Carl Bache, Hans Basbøll, Carl-Erik Lindberg, 2011-12-01 Research on language universals and research on linguistic typology are not antagonistic but rather complementary approaches to the same fundamental problem the relationship between the amazing diversity of languages and the profound unity of language Only if the true extent of typological divergence is recognized can universal laws be formulated In recent years it has become more and more evident that a broad range of languages of radically different types must be carefully analyzed before general theories are possible Typological comparison of this kind is now at the centre of linguistic research The series empirical approaches to language typology presents a

platform for contributions of all kinds to this rapidly developing field The distinctive feature of the series is its markedly empirical orientation All conclusions to be reached are the result of a deepened study of empirical data General problems are focused on from the perspective of individual languages language families language groups or language samples Special emphasis is given to the analysis of phenomena from little known languages which shed new light on long standing problems in general linguistics The series is open to contributions from different theoretical persuasions It thus reflects the methodological pluralism that characterizes the present situation Care is taken that all volumes be accessible to every linguist and moreover to every reader specializing in some domain related to human language A deeper understanding of human language in general based on a detailed analysis of typological diversity among individual languages is fundamental for many sciences not only for linguists Therefore this series has proven to be indispensable in every research library be it public or private which has a specialization in language and the language sciences To discuss your book idea or submit a proposal please contact Birgit Sievert
