Aspects Of Hypertension Management:

Arterial hypertension in clinical practice: study and analysis of biotechnological and telemedicine models Michele Karaboue, 2025-06-13 Arterial hypertension in clinical practice study and analysis of biotechnological and telemedicine models opera di Michele Karaboue *Aspects of Hypertension Management* Gordon Mallarkey, 1999 *Manual of Hypertension of the European Society of Hypertension, Third Edition* Giuseppe Mancia, Guido Grassi, Konstantinos Tsioufis, Anna Dominiczak, Enrico Agabiti Rosei, 2019-06-06 The Manual of Hypertension of the European Society of Hypertension reflects emerging concepts that have the potential to impact diagnostic and therapeutic approaches to hypertension Updating all material this new edition also delves into a number of areas that have received heightened interest in recent years or have become a matter of debate due to the controversial interpretation of the available data FEATURES Reflects emerging concepts impacting diagnostic and therapeutic approaches Explores background history epidemiology and risk factors Describes pharmacological nonpharmacological and medical treatments Examines hypertension in special populations and treatment **Blood Pressure Control for Doctors and Their Patients: Slippery Issues** Mykola Iabluchanskyi, 2024-11-25 The book immerses the reader in the complexities of managing hypertension a common and often misunderstood condition This book is not a standard manual but rather a research text that challenges conventional wisdom and addresses the slippery issues that are often overlooked in typical discussions of blood pressure management Covering topics from the evolution of measurement methods such as the transition from manual to digital sphygmomanometers to the complex considerations of ambulatory blood pressure monitoring the authors provide a comprehensive overview of current technological advances and the rationale for their use The discussion extends to a critical analysis of standard blood pressure measurement criteria revealing the potential for overestimation of systolic and underestimation of diastolic pressures which can lead to suboptimal patient care In addition the book examines specific clinical scenarios such as isolated diastolic hypertension and the consequences of beta blocker use providing insights into the delicate balance required in prescribing medications and the broader impact of pharmaceuticals on treatment Emphasizing an individualized approach to medication frequency based on individual metabolic rates the authors argue against a one size fits all approach to hypertension management advocating for individualized treatment plans that take into account circadian and seasonal rhythms and patient specific factors The book also critiques existing hypertension guidelines suggesting that they often fail to address the real challenges of patient adherence and the diverse responses to treatment across populations The book encourages dynamic interactions between patients physicians and the medical community to enhance understanding and improve treatment outcomes This is the fourth book in a series by the authors that critically examines key issues in modern medicine inviting a reassessment of established medical practices and promoting a deeper understanding of health beyond the traditional Each chapter addresses not only the technical aspects of hypertension treatment but also the ethical practical and philosophical

aspects of healthcare The authors are grateful to their colleagues for the reviews and insights that have enriched this publication and invite further comments from readers to continue the dialogue on improving hypertension treatment and patient care worldwide

Ethnic Factors in Health and Disease J. K. Cruickshank, D. G. Beevers, 2013-10-22 Ethnic Factors in Health and Disease discusses ethnicity from a medical perspective The book is comprised of 35 chapters that are grouped into four sections The text first covers the background issues concerning the relationship between ethnicity and health The next part deals with topics related to epidemiology such as the health of migrants and interethnic comparison of cardiovascular disease Next the book tackles the sociology of health this part covers occupational status housing and racism The last part discusses the specific medical aspects including pregnancy viral infections and cardiovascular disease The book will be of great use to medical researchers and practitioners Professionals dealing with ethnicity such as sociologists anthropologists and psychologists will also benefit from this book
