K. Mehta, 2003 **The Asthmatic's Action Plan** John Chapman, 1991 Notes on Asthma; Its Nature, Forms, and Treatment John Charles THOROWGOOD (M.D.), 1870 **Alternative Medicine for the Elderly** P. Cherniack, N. Cherniack, 2013-04-18 The explosion of information about complementary and alternative medicine CAM has demanded the attention of health professionals and responsible consumers including the elderly Increasingly medical schools are providing education about CAM This book brings together for academicians and interested mainstream practitioners much of the current information on CAM and its role in the health of the elderly The individual chapters are thoroughly researched and quite readable even for patients and the lay public concerned with the state of the evidence and art supporting CAM's role in prevention and management of illness and well being This book provides educators with much necessary information needed to prepare coursework and learning activities Although definitive data are lacking regarding efficacy and even safety of CAM methodologies many chapters in this book summarize the existing evidence in a usable way The topics analyzed range from well accepted therapies such as vitamin E for dementia and zinc tablets for the common cold to far less conventional therapies such as transcendental meditation The conclusions are often surprising but well presented and defended Even the most highly controversial areas such as the use of acupuncture to treat low back pain and osteoarthritis of the knee are thoroughly and fairly reviewed Finally the chapters address some of the political issues that challenge CAM These issues include who should be allowed to practice a CAM discipline whose efficacy is not based on the scientific method and some of the state to state variations in practice standards and licensure Clinical Naturopathic Medicine Leah Hechtman, 2012 Clinical Naturopathic Medicine is a foundation clinical text integrating the holistic traditional principles of naturopathic philosophy with the scientific rigour of evidence based medicine EBM to support contemporary practices and principles The text addresses all systems of the body and their related common conditions with clear accessible directions outlining how a practitioner can understand health from a naturopathic perspective and apply naturopathic medicines to treat patients individually These treatments include herbal medicine nutritional medicine and lifestyle recommendations All chapters are structured by system and then by condition so readers are easily able to navigate the content by chapter and heading structure The content is designed for naturopathic practitioners and students both undergraduate and postgraduate levels and for medical and allied health professionals with an interest in integrative naturopathic medicine detailed coverage of naturopathic treatments provides readers with a solid understanding of the major

therapeutic modalities used within naturopathic medicine each system is reviewed from both naturopathic and mainstream medical perspectives to correlate the variations and synergies of treatment only clinically efficacious and evidence based treatments have been included information is rigorously researched over 7500 references from both traditional texts and recent research papers the content skilfully bridges traditional practice and EBM to support confident practitioners within the current health care system

Botanical Medicine in Clinical Practice Ronald Ross Watson, Victor R. Preedy, 2008 The potential benefits of plants and plant extracts in the treatment and possible prevention of many leading health concerns are historically well known and are becoming more widely studied and recognized within the medical community It is these studies that led to the first compilation of new research developments identifying new extracts and uses for plants in disease prevention and treatment This major comprehensive reference work contains contributions from more than 150 clinical and academic experts covering topics such as treatments of cancer and cardiovascular diseases as well as historical plant use by indigenous people supported by recent scientific studies Authors review the safety and efficacy of botanical treatments while identifying the sources historical supportive data and mechanisms of action for emerging treatments Written by researchers currently carrying out identification and biomedical testing this is the most up to date text on the latest research from all over the world It is an essential resource for health care practitioners and herbalists as well as researcher students and professionals in botany and alternative medicine
