Develop Your Career With a Professional Certification Bob Collins, 2014-09-07 Professional certifications differ from other types of credentialing and education and they can have a significant effect on an individual's career. In *Develop Your Career With a Professional Certification* Bob Collins delves deeper into professional certifications and their benefits. He details how they differ from other credentials, how to determine which certification to pursue, how to prepare for a certification exam, ways to maintain a certification. Federal Aviation Regulations/Aeronautical Information Manual 2013 Federal Aviation Administration, 2012-11 All the information you need to operate safely in U.S. Code of Federal Regulations, 1999 Special edition of the Federal Register containing a codification of documents of general applicability and future effect with ancillaries. *Federal Register*, 2013-12 *The Code of Federal Regulations of the United States of America*, 1975 The Code of Federal Regulations is the codification of the general and permanent rules published in the Federal Register by the executive departments and agencies of the Federal Government. **Federal Aviation Regulations** United States. Federal Aviation Administration, 1997 **A Parallel Postsecondary Universe** Clifford Adelman, 2000 This report describes a new system of credentialing that has arisen in the information technology and telecommunications industries over the past decade. It compares this system to traditional higher education, identifying both similarities and dissimilarities and points to some cases in which the two interact. The summary section of this report emphasizes the major themes of the certification system and its relationship to higher education: 1 The system is global and operates in many languages. 2 The student, not the institution, is at the center of the system. 3 The system has brought competency-based education and performance assessment to a status they have never enjoyed within traditional higher education. 4 Certification replaces neither experience nor degrees and the IT system does not pretend to be higher education. The summary also indicates the critical need for more information on certification candidates and providers of course work since the new system is now large enough to play a role in state and national planning for postsecondary education.
