A Warm Past:

Slang and Its Analogues Past and Present: Stra to Z John Stephen Farmer, 1904 **The Social Impacts of Climate Change in China over the Past 2000 Years** Xiuqi Fang, Yun Su, Jingyun Zheng, Lingbo Xiao, Zhudeng Wei, Jun Yin, 2024-03-25 This book aims to illustrate how climate change had impacted the socio economic development in the history of China under the framework of food security The 10 years resolution sequences indexing the status of social and economic subsystems in China over the past 2000 years are reconstructed Statistical methods are used to reveal the major characters and main process of the impact of historical climate change on China s social economy This book serves as a reference both for researchers graduates and undergraduates majoring in geography climatology history and other related fields **The Climate of Past Interglacials** F. Sirocko, M. Claussen, T. Litt, M.F. Sanchez-Goni, 2006-12-08 Historically climate fluctuations such as the Little Ice Age show that interglacial climate change is not entirely stable but responds to even subtle changes in radiative forcing Through research it has been made clear that even an abrupt change of climate within years is not just a theoretical possibility but has in fact happened in the prehistoric past It is therefore clear that in principle it could happen again Human civilization has exploded under the mild and relatively stable climatic conditions that have prevailed over the last 11 000 years This book focuses on revisiting the past and to study climate and environment in a suite of experiments where boundary conditions are similar but not identical to today so we can learn about the climate environment system its sensitivity thresholds and feedback The palaeoclimate community holds an important key to scientific information on climate change that provides a basis for appropriate adaptation and mitigation strategies The authors of this book have taken up this challenge and summarize their results in this special volume It presents state of the art science on new reconstructions from all spheres of the Earth System and on their synthesis on methodological advances and on the current ability of numerical models to simulate low and high frequency changes of climate environment and chemical cycling related to interglacials Summarizes important information on climate change providing a basis for appropriate adaptation and mitigation strategies for human civilization Reports on new reconstructions on methodological advances numerical models simulating low and high frequency changes and chemical cycling related to interglacials Incorporates palaeovegetation and numerical modeling of climate and environmental and geochemical parameters to address regional feedback to global change with successful data models Meteorological and Chronological Register Sir Leonard Hill, 1869 The Commercial & Financial Chronicle ..., 1881 *Climatic Variations and Forcing Mechanisms of the Last 2000 Years* Philip Douglas Jones, Raymond Stephen Bradley, Jean Jouzel, 2013-06-29 A profound knowledge of the past climate is vital for our understanding of global warming The past 2000 years are both the period which is of most relevance to the next century and that for which there is the most evidence High resolution proxy records for this period are available from a variety of sources Five sections consider dendroclimatology ice cores corals historical records lake varves and other indicators The final two sections cover the

histories of various forcing factors and attempt to bring together records from a variety of sources and provide explanations
