Asian Energy Factor Myths And Dilemmas Of Energy Security And The Pacific Future:

The Asian Energy Factor Robert A. Manning, 2000 Robert A Manning debunks key myths about the oil industry that the world is running out of oil that the Caspian Basin is the new Persian Gulf that resource scarcity combined with military modernization economic buoyancy and nationalism will lead to military conflict and that territorial disputes among Asian nations are fueled by resource competition His book assesses the energy challenges and strategies of Asian nations and explores the new geopolitics emerging out of their efforts to meet these challenges Publisher description

Asian Energy Security H. Lai, 2009-03-02 The main focus of the contributors of this volume is to analyze closely major aspects of energy security energy diplomacy and maritime security in East and Southeast Asia Specifically they examine the current state of energy security and maritime security of China and Japan as well as Southeast Asia

Energy Security in Asia Michael Wesley, 2007-01-24 This book explores the various dimensions of energy security in Asia which has become an increasingly important geopolitical issue Reputable international contributors look at the roles played by each of the major energy importers the United States China Japan and India as well as the main suppliers the OPEC states Russia the Central Asian states and Australia In each case the domestic politics of energy security are investigated and state interests and perspectives on the issue are considered Analyzing the policy and security aspects of energy security the book includes an examination of the geopolitics of energy competition strategic economic and environmental dimensions the impacts of energy security on human security With energy security being one of the central issues facing the world today this book is a timely and impressive appraisal of the major energy security issues facing Asia

The Energy Security Paradox Jonna Nyman, 2018-03-30 The decisions we make about energy shape our present and our future From geopolitical tension to environmental degradation and an increasingly unstable climate these choices infiltrate the very air we breathe Energy security politics has direct impact on the continued survival of human life as we know it and the earth cannot survive if we continue consuming fossil energy at current rates The low carbon transition is simply not happening fast enough and change is unlikely without a radical change in how we approach energy security But thinking on energy security has failed to keep up with these changing realities Energy security is primarily considered to be about the availability of reliable and affordable energy supplies having enough energy and it remains closely linked to national security The Energy Security Paradox looks at contemporary energy security politics in the United States and China the top two energy consumers and producers Based on in depth empirical analysis it demonstrates that current energy security practices actually lead to a security paradox they produce insecurity To illustrate this it develops the energy security paradox as a framework for understanding the interconnected insecurities produced by current practices However it also goes beyond this examining resistance to current practices to highlight that we not only can do energy security differently this is already happening In the process the volume demonstrates that the value of security depends on the context Based on this The Energy Security Paradox proposes a radical

reconsideration of how we approach and practice energy security Energy Security and the Indian Ocean Region Dennis Rumley, Sanjay Chaturvedi, 2015-07-24 First published in 2005 this book is the second volume produced by the Indian Ocean Research Group IORG The Indian Ocean Region has become increasingly important to discussions on energy security not only because of the critical importance of regional states as energy suppliers but also because of the essential role of the Ocean as an energy route The main purpose of this volume is to provide an elaborate and critical evaluation of some of these issues and their implications for regions outside the Indian Ocean Energy Security Cooperation in Northeast Asia Bo Kong, Jae H. Ku, 2015-04-24 Drawing on cutting edge research from leading scholars this book investigates state preferences for regime creation and assesses state capacity for executing these preferences in Northeast Asia's energy domain defined as the geographical area comprising the following countries Russia Mongolia China Japan South Korea and North Korea It examines questions pertaining to how states perceive the need and necessity for establishing a regime when it comes to the issue of energy and how much commitment they make to the effort in Northeast Asia The book analyses the factors that shape each country's fundamental energy interests in the region how these interests impact their attitudes toward engaging the region on energy security and the way they carry out their regional engagement Based on countries' interests in promoting institutionalized regional energy cooperation and their capacity for forging that cooperation the collection assesses each state's role in contributing to an energy regime in Northeast Asia It then concludes with a critique on the decade plus quest for energy security cooperation in Northeast Asia and suggests ways forward for facilitating regional energy security cooperation This book will be of great interest to scholars and students of environmental policy energy policy security studies Asian studies and international relations Asian Energy Markets The Emirates Center for Strategic Studies and Research, 2004-08-23 Energy has become a crucial determinant shaping the security environment of Asia The continent's phenomenal growth is projected to raise oil and gas consumption to dramatic new levels As major Asian nations become net energy importers this thirst for oil will determine world energy export patterns and shape regional geopolitics With the Arabian Gulf supplying the major proportion of Asian energy needs Gulf Asia links will emerge as a key factor in the global energy scenario Energy security concerns will dominate Asian economic policy and strategic decision making and spur Asian investment in oil exploration oil refining and development of alternative energy sources What are the economic and strategic implications of Asia's growing dependence on Gulf oil How far can Asian countries counter such dependence by improving energy efficiency and developing new sources What are the energy transitions that Asian nations are undergoing What kind of structural reforms are needed in the Asian energy markets What are the implications of Asian energy consumption trends and current economic reforms for the Arabian Gulf producers What will the impact of Asian markets be on the global energy scenario These and related issues were examined by energy experts at the Seventh Annual Energy Conference held in Abu Dhabi from January 13-14 2002 This volume of conference presentations discusses wide ranging

issues relating to the Asian energy sector including supply security consumption trends privatization moves energy diversification energy self sufficiency and foreign investment **Tigers' Roar** Julian Weiss, 2016-09-16 Despite Asia's protracted economic troubles the region is poised to recover and perhaps become stronger than ever This timely work identifies the major challenges facing Asia's Four Tigers Singapore Taiwan South Korea and Hong Kong Japan China and their Southeast Asian neighbors Thailand Indonesia Malaysia and the Philippines as the region increases its role and stature on the world stage Highly regarded Asia policy makers and opinion shapers consider such key questions as What is the appropriate response to China's ascent Are there prospects for U S Asian partnerships in such areas as the environment Is economic cooperation between both sides of the Pacific realistic How can Americans gain from Asia's attempts to rebuild her institutions And will East Asia and the United States adjust to a multi polar security and economic milieu *The Presence of China and the Chinese Diaspora in Portugal and Portuguese-Speaking Territories* , 2021-09-06 This book brings together works by specialists from various areas of the social sciences to reflect on the presence of China in Portugal and in Portuguese speaking territories From the first Chinese coolies that migrated to the former Portuguese colonies more than 100 years ago to the current investments along the Belt and Road Initiative we take the pulse of this historic social political and economic presence and flows that continues to renew and reinvent itself in the face of the challenges of contemporaneity

Securing Japan Richard J. Samuels, 2008 Japan's grand strategy for securing itself has a long even venerable history from the Meiji politicians who recognized the connection between military advance and economic success to the consequences that led to Japan's defeat in World War II and on to the postwar compact with the United States The author here explains how these ideological connections explain today's debates He argues that Japan will eventually achieve a balance between national autonomy and national strength a position that will allow it reduced dependence on the United States and less vulnerability to China Over the last decade a revisionist group of Japanese policy makers has consolidated power taking steps to position Japan's military to play a global security role

Enjoying the Melody of Phrase: An Psychological Symphony within **Asian Energy Factor Myths And Dilemmas Of Energy Security And The Pacific Future**
