

MERCURY FALLING: COLD SNAP ROILS ASIAN ENERGY MARKETS

Winter temperatures in North Asia fell to their lowest in decades in early January, sending fuel demand for heating and power generation through the roof. Shortages sent countries scrambling to shore up supplies, utilities were forced to switch to alternatives like oil, and a domino effect affected fuel supply in the rest of the region. Here's a quick look at the key indicators.

Asian Energy Markets:

Asian Energy Markets The Emirates Center for Strategic Studies and Research, 2004-08-23 Energy has become a crucial determinant shaping the security environment of Asia. The continent's phenomenal growth is projected to raise oil and gas consumption to dramatic new levels. As major Asian nations become net energy importers, this thirst for oil will determine world energy export patterns and shape regional geopolitics. With the Arabian Gulf supplying the major proportion of Asian energy needs, Gulf-Asia links will emerge as a key factor in the global energy scenario. Energy security concerns will dominate Asian economic policy and strategic decision making and spur Asian investment in oil exploration, oil refining and development of alternative energy sources. What are the economic and strategic implications of Asia's growing dependence on Gulf oil? How far can Asian countries counter such dependence by improving energy efficiency and developing new sources? What are the energy transitions that Asian nations are undergoing? What kind of structural reforms are needed in the Asian energy markets? What are the implications of Asian energy consumption trends and current economic reforms for the Arabian Gulf producers? What will the impact of Asian markets be on the global energy scenario? These and related issues were examined by energy experts at the Seventh Annual Energy Conference held in Abu Dhabi from January 13-14, 2002. This volume of conference presentations discusses wide-ranging issues relating to the Asian energy sector including supply security, consumption trends, privatization, moves, energy diversification, energy self-sufficiency and foreign investment.

Asian Energy Markets Emirates Center for Strategic Studies & Research, 2004-12-24 With the Arab Gulf States supplying the major proportion to Asian energy needs, Gulf-Asia links will emerge as a key factor in the global energy scenario. What are the economic and strategic implications of Asia's growing dependence on Gulf oil? How far can Asian countries counter such dependence by improving energy efficiency and developing new sources? What are the energy transitions that Asian nations are undergoing? This book seeks to address these questions and other issues relating to the Asian energy sector including supply security, consumption trends, privatization, moves, energy diversification, energy self-sufficiency and foreign investment. *Asian Energy Markets: Dynamics and Trends. (in Arabic & English)*. Markaz al-Imārāt lil-Dirāsāt wa-al-Buḥūth al-Istirāṭijīyah, 2005. *Asia's Energy Revolution* Joseph Jacobelli, 2021-06-21 Asia is home to 60 per cent of the world's population including the world's two most populous nations, China and India. The region's economic gains and rising middle class are accelerating demand for more consumer goods and a better quality of life. For further economic growth to be realised, the region will need a massive supply of additional energy, three to five fold 2020's amount by 2050. These changes create new business and investment opportunities for domestic companies and overseas participants. Asia's energy market, already the world's biggest, will soon be the most advanced. There will be mass adoption of digital technologies like artificial intelligence to make the distribution of solar wind and other clean resources smarter and more efficient. Led by China, billions of dollars in capital investment will drive the region's shift to green sustainable energy, replacing polluting and

expensive fossil fuels which will help to rein in climate change In Asia's Energy Revolution leading energy markets analyst and practitioner Joseph Jacobelli explains why Asia is the world's most important territory for energy transition how developments in the region will drive change in the rest of the world as well as how it will all be financed The book discussion includes Analysis of past events and forward looking analysis of the industry in the region encompassing commercial economic and financial aspects Appraisal of new energy technologies such as electric vehicles and digital solutions such as blockchain for energy Review of the capital flows and sustainable financing channels needed to fund energy infrastructure and tech growth

Energy Market Integration in East Asia Yanrui Wu, Fukunari Kimura, Xunpeng Shi, 2013-12-04 East Asian nations through the dialogue between ASEAN and its partners have been promoting energy market integration EMI for a decade The formation of the East Asian Summit EAS group in 2005 adds new momentum to the EMI course in the region The objective of this edited volume is to present new insights into the understanding of EMI in East Asia and draw implications for further development This book is the first publication of its kind exclusively focusing on EMI in East Asia The chapters are written by a distinguished group of specialists in the field of energy policy business and economics The covered topics range from the general debates about EMI to regional policy responses A variety of qualitative and quantitative methods are employed in this book For qualitative methods public goods theory and the comparative study method are two examples The quantitative methods include economic growth theory principle component approach input output table computable general equilibrium CGE models and econometric techniques Important policy implications can be drawn from the findings One clear message is that EMI should be promoted actively but in a gradual incremental manner Other policy implications are related to inter regional governance infrastructure development and gas market integration The content has not been published elsewhere and hence makes a unique contribution to the literature There are also case studies of specific energy sectors such as petroleum and natural gas Overall this book should be of interest to a wide audience such as academia business analysts and policy makers

China's Carbon-Energy Policy and Asia's Energy Transition Akihisa Mori, 2021-12-29 This book seeks to examine the impacts associated with China's carbon energy policy in Asia and how coupled with the Belt and Road Initiative these effects prompt foreign direct investments in coal power and exports of renewable energy technologies China shows a co evolution of carbon energy policy and energy transitions from coal to renewables Assessing how the policy intensifies pressures and motivations to Chinese companies chapters in this edited volume analyse how the policy has changed energy and CO2 emissions in Asia through the lens of carbon leakage relocation and halos Contributors present in depth studies on China's investments and exports and also its impacts on Indonesia India Vietnam and Japan Using applied computable general equilibrium and scenario input output analyses chapters investigate if regional electricity connectivity reduces new coal power investments through efficiency gain Arguing that China is shifting from the world's factory to the leading innovator and Asia's demand centre it is ultimately demonstrated that China is likely to achieve climate targets

whereas Asia to increase CO₂ emissions and economic reliance on China China's Carbon Energy Policy and Asia's Energy Transition will be of significant interest to students and scholars of energy environment and sustainability studies as well as Chinese studies and economics *Asia's Energy Revolution* Joseph Jacobelli, 2021-06-21 Asia is home to 60 per cent of the world's population including the world's two most populous nations China and India The region's economic gains and rising middle class are accelerating demand for more consumer goods and a better quality of life For further economic growth to be realised the region will need a massive supply of additional energy three to five fold 2020's amount by 2050 These changes create new business and investment opportunities for domestic companies and overseas participants Asia's energy market already the world's biggest will soon be the most advanced There will be mass adoption of digital technologies like artificial intelligence to make the distribution of solar wind and other clean resources smarter and more efficient Led by China billions of dollars in capital investment will drive the region's shift to green sustainable energy replacing polluting and expensive fossil fuels which will help to rein in climate change In Asia's Energy Revolution leading energy markets analyst and practitioner Joseph Jacobelli explains why Asia is the world's most important territory for energy transition how developments in the region will drive change in the rest of the world as well as how it will all be financed The book discussion includes Analysis of past events and forward looking analysis of the industry in the region encompassing commercial economic and financial aspects Appraisal of new energy technologies such as electric vehicles and digital solutions such as blockchain for energy Review of the capital flows and sustainable financing channels needed to fund energy infrastructure and tech growth **Natural Gas and Sustainable Development in Asian Energy Markets** Roger C. Unlocking Private Investment in Sustainable Infrastructure in Asia Bhajan Grewal, Nella Hendriyetti, Iskandar Abdullaev, Chul Ju Kim, Naoyuki Yoshino, Eisa Khan Ayoob Ayoobi, 2022-10-24 Investment in infrastructure is essential for promoting economic growth and while countries in Asia have enjoyed higher rates of gross domestic product growth in recent years the region remains severely deficient in the scale and quality of sustainable infrastructure Moreover population growth and climate change continue to put increasing pressure on the need for strategic and farsighted development calling for policy makers to reevaluate infrastructure governance to ensure sustainable economic growth Currently in developing Asia most investment in infrastructure comes from the public sector However with growing fiscal deficits and other budgetary constraints it is essential to develop alternative sources of investment for infrastructure projects This presents opportunities to tap into the private sector which can play an instrumental role in minimizing the funding gap through the development of stronger more transparent public private partnerships PPPs and incentivizing sustainable infrastructure investment This book provides a scholarly discussion on the importance of PPPs and approaches to unlock private participation in infrastructure investment based on lessons from across Asia Among the proposed schemes are government tax incentives development based land value capture strategy under PPP land pooling Viability Gap Funds Project

Development Facilities and other guarantees The book aims to assess the impacts and future of sustainable infrastructure investments and examines the role of governments in mobilizing financial resources and new models for unlocking private investment in sustainable infrastructure This book consists of fifteen original chapters on the experiences of the Central Asia Regional Economic Cooperation CAREC and a few other cases for promoting private investment in sustainable infrastructure The fact that not much has been published previously on this theme makes this book a welcome and timely addition to the much needed knowledge on this subject The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
