Asian Power And Politics:

Asian Power and Politics Lucian W. PYE, Mary W. Pye, Lucian W Pye, 2009-06-30 In a major new book Lucian W Pye reconceptualizes Asian political development as a product of cultural attitudes about power and authority He contrasts the great traditions of Confucian East Asia with the Southeast Asian cultures and the South Asian traditions of Hinduism and Islam and explores the national differences within these larger civilizations Breaking with modern political theory Pye believes that power differs profoundly from one culture to another In Asia the masses of the people are group oriented and respectful of authority while their leaders are more concerned with dignity and upholding collective pride than with problem solving As culture decides the course of political development Pye shows how Asian societies confronted with the task of setting up modern nation states respond by fashioning paternalistic forms of power that satisfy their deep psychological craving for security This new paternalism may appear essentially authoritarian to Western eyes but Pye maintains that it is a valid response to the people s needs and will ensure community solidarity and strong group loyalties He predicts that we are certain to see emerging from Asia s accelerating transformation some new version of modern society that may avoid many of the forms of tension common to Western civilization but may also produce a whole new set of problems This book revitalizes Asian political studies on a plane that comprehends the large differences between Asia and the West and at the same time is sensitive to the subtle variations among the many Asian cultures Its comparative perspective will provide indispensable insights to anyone who wishes to think more deeply about the modern Asian states *Power and Politics in Africa: A Boundary Generator* Takuo Iwata, 2025-01-07 Africa s potential and challenges in the 21st century make it a focal point for global attention The continent s political landscape is now more diverse with a mix of democracy authoritarianism peace and conflict Understanding the dynamics of African politics is crucial This comprehensive book delves into African Politics and International Relations exploring power through the lenses of politics geography sociology and anthropology It is based on the author s three decades of fieldwork and research across Africa Asia and the West Ideal for academic scholars students diplomats government officials journalists and NGO staff seeking to deepen their understanding of African politics and international relations *Power and Politics After Financial Crises* J. Robertson, 2007-11-20 Foreign exploitation of economic crises in the developing world has been a central claim of neoliberal critics This important and recurring international theme is the subject of closer scrutiny in this new collection where contributors offer competing interpretations of the interaction between international and domestic forces after crises *Skin Color, Power, and Politics in America* Mara Cecilia Ostfeld, Nicole Yadon, 2022-04-30 A person s skin color affects their life experiences including income educational attainment health outcomes exposure to discrimination interactions with the criminal justice system and one s sense of ethnoracial group belonging But do these disparate experiences affect the relationship between skin color and political views In *Skin Color Power and Politics in America* political scientists Mara Ostfeld and Nicole Yadon explore the relationship

between skin color and political views in the U S among Latino Black and White Americans They examine how skin color influences an individual s politics and whether a person s political views influence how they assess their own skin color Ostfeld and Yadon surveyed over 1 300 people about their political views including party affiliation their opinions on welfare and the importance of speaking English in the U S The authors created a matrix grounded in their Roots of Race framework which predicts the relationship between skin color and political attitudes for each ethnoracial group based on the blurriness of the group s boundaries and historical levels of privilege They draw upon three distinct measures of skin color to conceptualize the relationship between skin color and political views Machine Rated Skin Color measured with a light reflectance meter Self Assessed Skin Color using the Yadon Ostfeld Skin Color Scale and Skin Color Discrepancy the difference between one s Machine Rated and Self Assessed Skin Color Ostfeld and Yadon examine patterns that emerge among these measures and their relationships with life experiences and political stances Among Latinos a group with relatively blurry group boundaries and low levels of historical privilege the authors find a robust relationship between political views and Self Assessed Skin Color Latinos who overestimate the lightness of their skin color are more likely to hold conservative views on current racialized political issues such as policing Latinos who overestimate the darkness of their skin color on the other hand are more likely to hold liberal political views As America s major political parties remain divided on issues of race this suggests that for Latinos self reported skin color is used as a means of aligning oneself with valued political coalitions African Americans another group with low levels of historical privilege but with more clearly defined group boundaries demonstrated no significant relationship between skin color and political attitudes Thus the lived experiences associated with being African American appeared to supersede the differences in life experiences due to skin color Whites a group with more historical privilege and increasingly blurry group boundaries showed a clear relationship between machine assessed skin color and attitudes on political issues Those with darker Machine Rated Skin Color are more likely to hold conservative views suggesting that they are responding to the threat of losing their privilege in a multicultural society At a time when the U S is both more diverse and politically divided Skin Color Power and Politics in America is a timely account of the ways in which skin color and politics are intertwined

Imitation and Politics Wade Jacoby, 2001

Following World War II a poorly funded piecemeal effort to transfer British and American institutions into West Germany resulted in many positive changes for that nation s citizens After reunification however a more ambitious well funded and systematic effort to establish West German institutions in the former GDR has been less effective Through a close analysis of these two cases Wade Jacoby explores the conditions under which one society can serve as a model for the reshaping of another In the initial transfer Jacoby finds Allied occupying forces sought to build institutions in Germany that were the functional equivalents of ones they valued at home They encouraged the development of selected German organizations that became co architects of the postwar society Several decades later by contrast policymakers in Bonn used exact rather than

functional imitation and they ignored regional interests when redesigning East German society For both cases Jacoby focuses on attempts to reform industrial relations and secondary education For innovations to be pulled in from abroad Jacoby argues local civic groups must participate in and benefit from the institution building process In addition the state imposing the transfer must have a flexible strategy By looking at international examples Jacoby provides further evidence that political imitation is at heart a process of coalition building Comparative Politics: The politics of Asia Howard J. Wiarda, 2005

Power and Politics in World Athletics Jörg Krieger, 2021-06-20 This book provides the first detailed history of one of the most powerful international sport organisations the International Association of Athletics Federations IAAF since 2019 known as World Athletics The book critically assesses the internal power relations within the IAAF by focusing on the IAAF leadership Based on extensive archival research Power and Politics in World Athletics offers a nuanced analysis of the institutionalised strategies that developed as a reflection of the IAAF s interests and aims to create a broader understanding of the global sport system With only six presidents in over a century of existence the IAAF s leaders had profound impacts on other international institutions national stakeholders and sporting participants Through four sections the book identifies various key turning points in the history of the governing body of athletics and explores the IAAF s foundation the policies of past IAAF presidents and controversial issues such as doping corruption and manipulation through a socio historical lens The book shows that while anyone could take part in athletics policies enacted by each president served to ostracize those groups who did not fit into the IAAF s vision of an equal playing field This book is essential reading for anyone with an interest in sport history sport sociology the politics of sport sport management sport governance or international organisations
