ASPLOS '18 Asplos, 2018-10-23 The ASPLOS 18 program is the result of a thorough evaluation process which we started by forming the program committee PC with 50 members and the external review committee ERC with 73 members Moreover we split up the PC into two independent sub

PCs while keeping the ERC as a single unit We carefully assigned the PC members to the two groups ensuring that 1 each sub PC would cover all ASPLOS topics and 2 the experts on each topic would be evenly split across the sub PCs In response to the call for papers we received 319 submissions just one shy of last year s record This number includes 18 submissions that were either withdrawn by their authors or desk rejected for clear violations of the formatting rules After receiving reviewing bids from most committee members we also split the submissions evenly across the two sub PCs so that each submission would receive reviews from only one sub PC We manually moved submissions across sub PCs to maximize reviewer expertise according to the PC members bids The review process proceeded in two rounds followed by an extensive online discussion period During the first round all submissions received 3 4 reviews Based on these reviews we selected 158 submissions to go through the second round of reviews which produced 2 4 additional reviews for these submissions During the review process we also requested reviews from 52 external experts on a case by case basis Throughout the process our main goal in assigning reviewers to submissions was to maximize reviewer expertise Overall the committees and external experts produced 1 227 reviews After the online discussion period involving all reviewers we selected 100 submissions for discussion 15 papers online tagged tentative accepts and 85 papers online tagged discuss at meeting during the PC meeting on November 10 2017 at Georgia Tech 47 of the 50 PC members were physically present at the meeting and 2 others participated remotely The whole committee met together in the morning and split up into the two independent sub PCs in the afternoon We did not set a limit for the number of accepted submissions During the meeting we accepted 47 submissions and conditionally accepted subject to shepherding 9 others After carefully addressing the reviewers comments all shepherded submissions were ultimately accepted The acceptance rate of the two sub PCs was exactly the same 28 151 and 28 150 To complete the program we invited two outstanding keynote speakers Hillery Hunter IBM Research and Fred Chong University of Chicago We are pleased that the 56 accepted submissions and 2 keynote talks represent an exciting spectrum of traditional and emerging ASPLOS topics
