Waterfront Workers of New Orleans Eric Arnesen, 1994 During the nineteenth century American and foreign travelers often found New Orleans a delightful exotic stop on their journeys few failed to marvel at the riverfront the center of the city's economic activity But absent from the tourism industry's historical recollection is any reference to the immigrants or black migrants and their children who constituted the army of laborers along the riverfront and provided the essential human power to keep the cotton sugar and other goods flowing In examining one diverse group of workers the 10 000 to 15 000 cotton screwmen longshoremen cotton and round freight teamsters cotton yardmen railroad freight handlers and Mississippi River roustabouts this book focuses primarily on the workplace and the labor movement that emerged along the waterfront From the preface

New Orleans Dockworkers Daniel Rosenberg, 1988-01-01 This book investigates the conditions which led to a remarkable instance of interracial solidarity known as half and half an expression used to identify the cooperation and cohesion among 10 000 Black and white dockworkers during the early twentieth century Through interracial agreements which divided work and union leadership equally between Blacks and whites dockworkers reduced the workload and pace imposed by shipping firms and formed the basis for the general dock strike of 1907 described as one of the most stirring manifestations of labor solidarity in American history Rosenberg explores the phenomenon of half and half within the context of progressive segregation as employers encouraged competition between and division of the races Rosenberg also probes the nature of longshore work dockworkers views of Jim Crow and industrial unionist trends as well as the conclusions drawn by dockers after the levee race riots of the 1890s the working of the white and negro races on terms of equality has been the fruitful source of most of the trouble on the New Orleans levee

Waterfront Workers Calvin Winslow, 1998 Few work settings can compete with the waterfront for a long rich history of multi ethnic and multiracial interaction Here five scholars focus on the complex relationships involved in this intersection of race class and ethnicity Opens up some of the most significant questions in American labor and social history including the struggle for control at the workplace and even more important the relationship between black and white workers and among various ethnic groups on the docks David Brundage author of The Making of Western Labor Radicalism Denver's Organized Workers 1878 1905 A volume in the series The Working Class in American History edited by David Brody Alice Kessler Harris David Montgomery and Sean Wilentz

Dock Workers Sam Davies, Colin J. Davis, David de Vries, Lex Heerma van Voss, Lidewij Hesselink, Klaus Weinbauer, 2017-09-29 Workers who

loaded and unloaded ships have formed a distinctive occupational group over the past two centuries As trade expanded so the numbers of dock labourers increased and became concentrated in the major ports of the world This ambitious two volume project goes beyond existing individual studies of dock workers to develop a genuinely comparative international perspective over a long historical period Volume 1 contains studies of 22 major ports worldwide Built around an agreed framework of issues these port studies examine the type of workers who dominated dock labour their race class and ethnicity the working conditions of dockers and the role of government as employer arbitrator and supporter The studies also detail how dockers organized their labour patterns of strike action and involvement in political organizations The structure of the port city is also outlined and descriptions given of the waterside environment These areas of investigation form the basis for a series of 11 thematic studies which comprise Volume 2 Drawing on the information provided in the port studies these essays identify important aspects and recurring themes and explain how and why particular cases diverge from the rest The final chapter of the book synthesizes the various approaches taken to offer a model which suggests several configurations of dock labour and presents suggestions for future research This major scholarly achievement represents the most sustained attempt to date to provide a comparative international history of dock labour An annotated bibliography completes this essential reference work
