Organic Farming Toolkit:

Tools for Organic Farming George McRobie, 1990 This manual does not pretend to be exhaustive but is intended to serve the needs of the small to medium scale organic farmers in Europe and the USA The items were selected by practical farmers The book describes suitable low cost tools from hoes to lightweight threshers and lists suppliers and manufacturers

Farm Transitions Toolkit Jane Grimsbo Jewett, Hannah Lewis, Alex Baumhardt, 2011 **Drones and Geographical Information Technologies in Agroecology and Organic Farming** Massimo De Marchi, Alberto Diantini, Salvatore Eugenio Pappalardo, 2022-09-29 Although organic farming and agroecology are normally not associated with the use of new technologies its rapid growth new technologies are being adopted to mitigate environmental impacts of intensive production implemented with external material and energy inputs GPS satellite images GIS drones help conventional farming in precision supply of water pesticides fertilizers Prescription maps define the right place and moment for interventions of machinery fleets Yield goal remains the key objective integrating a more efficient use of resources toward an economic environmental sustainability Technological smart farming allows extractive agriculture entering the sustainability era Societies that practice agroecology through the development of human environmental co evolutionary systems represent a solid model of sustainability These systems are characterized by high quality agroecosystems and landscapes social inclusion and viable economies This book explores the challenges posed by the new geographic information technologies in agroecology and organic farming It discusses the differences among technology laden conventional farming systems and the role of technologies in strengthening the potential of agroecology The first part reviews the new tools offered by geographic information technologies to farmers and people The second part provides case studies of most promising application of technologies in organic farming and agroecology the diffusion of hyperspectral imagery the role of positioning systems the integration of drones with satellite imagery The third part of the book explores the role of agroecology using a multiscale approach from the farm to the landscape level This section explores the potential of Geodesign in promoting alliances between farmers and people and strengthening food networks whether through proximity urban farming or asserting land rights in remote areas in the spirit of agroecological transition The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons 4.0 license **Farming for the Long Haul** Michael Foley, 2019-02-01 It is all but certain that the next fifty years will bring enormous not to say cataclysmic disruptions to our present way of life World oil reserves will be exhausted within that time frame as will the lithium that powers today's most sophisticated batteries suggesting that transportation is equally imperiled And there is another even more dire limitation that is looming at current rates of erosion the world's topsoil will be gone in sixty years Fresh water sources are in jeopardy too In short the large scale agricultural and food delivery system as we know it has at most a few decades before it exhausts itself and the planet with it Farming for the Long Haul is about building a viable small farm economy that can withstand the

economic political and climatic shock waves that the twenty first century portends It draws on the innovative work of contemporary farmers but more than that it shares the experiences of farming societies around the world that have maintained resilient agricultural systems over centuries of often turbulent change Indigenous agriculturalists peasants and traditional farmers have all created broad strategies for survival through good times and bad and many of them prospered They also developed particular techniques for managing soil water and other resources sustainably Some of these techniques have been taken up by organic agriculture and permaculture but many more of them are virtually unknown even among alternative farmers This book lays out some of these strategies and presents techniques and tools that might prove most useful to farmers today and in the uncertain future
