Pro Plastic Free:

Sustainable Consumer Behavior Gerrit Antonides, 2018-07-06 This book is a printed edition of the Special Issue Sustainable Consumer Behavior that was published in Sustainability *Greener Marketing* John Grant, 2020-07-07 BUSINESS BOOK AWARDS FINALIST 2021 This timely book is a sequel to John Grant's Green Marketing Manifesto 2007 the award winning and bestselling definitive guide to green marketing and not greenwashing Fast forward to mid 2020 Climate Change is back at the top of the public and political agenda Even after covid 19 hundreds of big name CEOs are committing to a green recovery And surveys show widespread global public support for this and recent shifts in sustainable behaviours and attitudes in markets ranging from organic food to flying Sustainable brands are significantly outperforming conventional ones As are sustainability related stock prices Companies like Unilever continue to set ambitious targets related not just to climate but biodiversity and deforestation plastics social justice regenerative farming Sustainability related trends such as plant based foods and electric vehicles are showing steep growth and creating tomorrow's superbrands Impossible TESLA This book is packed with up to date learnings case examples and trends covering everything from eco labelling transparency and the circular economy to rebound effects sustainable finance blockchain and regenerative farming A core message being that to drive sustainability marketers firstly do really need to properly understand sustainability its many applications and implications Secondly to be effective marketers need to understand what it means to their consumers and other significant audiences Hence the book takes a long hard look at what was driving all the protests boycotts and petitions in 2019 and what ideas causes and platforms caught the public imagination The ultimate goal is to go beyond marketing that simply looks good to marketing that does good This book helps in achieving that goal by showing the reader how to Uncover strategies for sustainable marketing that actually deliver on green and social objectives not just greenwashing Reconceptualise marketing and business models and learn to recognise the commercial strategies and approaches that are no longer fit for purpose Learn how hot topics like the climate crisis biodiversity social justice single use plastics and supply chain transparency influence green and social marketing Read about numerous examples and case studies from both brand leaders and challengers that have developed innovations and fresh creative approaches to green and social marketing Get practical tools models facts strategies workshop and project processes and business case rationales so that you can build your own plans and proposals This book is intended to assist marketers by means of clear and practical guidance through a complex transition towards meaningful marketing that makes a positive creative impact on the climate crisis and on improving human life in troubled times Aimed both at big companies that are trying to be good and good companies that are trying to be big

Development in Coastal Zones and Disaster Management Amita Singh, R. Lalitha S. Fernando, Nivedita P. Haran, 2020-10-13 In the last two decades coastal regions have relatively endured some of the fiercest oceanic and geophysical disasters than the earlier decades Yet disaster management governance fails to match the human nonhuman and

environmental calamity which is unfolding in its most frequent and unpredictable pattern Between the Asian Tsunami of 2004 to the devastating Chennai and Kerala floods of 2018 the socio industrial livelihood impact alerts governments towards a greater and more serious compliance to laws for coastal conservation The United Nations Office for Disaster Risk Reduction UNDRR in 2018 had shocking statistics to share as the deaths and damages related to only Tsunami disaster at the coasts to 251 770 and US 280 billions respectively in the last 20 years 1998 2017 as compared to 998 and US 2 7 billion in the previous 20 years 1978 1997 Coastal conservation is no more a question of casual governance but has become a need for survival The region of South Asia which ranks much higher in its vulnerability weak resilience and relatively undersupplied governance structures ought to take this responsibility on a priority The spirit of Hyogu Declaration and the Sendai Framework for Action suggests preparedness and resilience building as key approach areas in coastal governance The book is incomparable in its holistic and transdisciplinary social science based approach to disaster management which links conservation of marine flora and fauna ecosystems and land management with decision making processes and coastal regulations These grass root findings from the subcontinent are substantiated by a section on the most powerful court battle on the Kerala Floods as a guideline for readers to discerningly identify an Act of God often used as a veil to hide lack of preparedness apathy and political greed This book becomes indispensable reading for anyone involved in research administration or any level of decision making for the mitigation and prevention of disasters Promoting Biodiversity in Food Systems Irana W. Hawkins, 2018-10-25 Describes the relationship between food systems and the planetary boundaries at risk Delineates the importance of food system related issues including biodiversity loss greenhouse gas emissions environmental degradation and human health Assesses the benefits of biodiversity promoting food systems and describes the importance of shifting national regional and global policy to support them Identifies the public health impacts of conventional food systems on consumer health Demonstrates how to put biodiversity promoting food systems into professional practice

Page,Joanne

Connell,2020-04-29 Tourism can be a challenging subject for students because it is both dynamic and susceptible to economic turbulence and shifts in trends Tourism A Modern Synthesis is an essential textbook for tourism students seeking a clear and comprehensive introduction to their studies that addresses these challenges The authors apply a business approach to the subject reflecting developments in the teaching and content of university courses and the text covers both key principles and contemporary themes and issues at a global scale Among the new features and topics included in this fifth edition are New and fully updated case studies to reflect current trends and emerging markets including Africa and Asia Up to date content on disruptive technologies such as Airbnb low cost airlines the e travel revolution and future developments Current debates in sustainable tourism including the anti tourism movement plastic use and the Sustainable Development Goals New content on evolving topics such as future employment human resource management in tourism and generational marketing Fully updated statistics and data A brand new Companion Website including an instructor s manual supplementary case studies weblinks multiple choice questions and PowerPoint slides This is the ideal guide to tourism for students across all levels serving as a point of reference throughout a programme of study Microplastic in the Environment: Pattern and Process Michael S. Bank,2021-10-09 This open access book examines global plastic pollution an issue that has become a critical societal challenge with implications for environmental and public health This volume provides a comprehensive holistic analysis on the plastic cycle and its subsequent effects on biota food security and human exposure Importantly global environmental change and its associated systems level processes including atmospheric deposition ecosystem complexity UV exposure wind patterns water stratification ocean circulation etc are all important direct and indirect factors governing the fate transport and biotic and abiotic processing of plastic particles across ecosystem types Furthermore the distribution of plastic in the ocean is not independent of terrestrial ecosystem dynamics since much of the plastic in marine ecosystems originates from land and should therefore be evaluated in the context of the larger plastic cycle Changes in species size distribution habitat and food web complexity due to global environmental change will likely alter trophic transfer dynamics and the ecological effects of nano and microplastics The fate and transport dynamics of plastic particles are influenced by their size form shape polymer type additives and overall ecosystem conditions In addition to the risks that plastics pose to the total environment the potential impacts on human health and exposure routes including seafood consumption and air and drinking water need to be assessed in a comprehensive and quantitative manner Here I present a holistic and interdisciplinary book volume designed to advance the understanding of plastic cycling in the environment with an emphasis on sources fate and transport ecotoxicology climate change effects food security microbiology sustainability human exposure and public policy *Plastics in the Aquatic Environment - Part II* Friederike Stock,Georg Reifferscheid,Nicole Brennholt,Evgeniia Kostianaia,2021-10-26 This book reviews comprehensively the opportunities and responsibilities of science society and politics to combat plastic pollution in marine and freshwaters It provides insights on

what information is needed and from whom and it outlines policies proposed by various institutions including OSPAR HELCOM and the European Union Plastic waste has become a global threat to the aquatic environment that does not stop at country borders Meanwhile there are many efforts in science industry commerce and governments to tackle the problem worldwide School education NGO public actions voluntary trade reduction measures governmental management options and governmental regulatory actions are part of the portfolio of efforts to deal with the problem Together with the companion volume Plastics in the Aquatic Environment Part I Current Status and Challenges it provides scientists policymakers and environmental managers with essential reference information on how this problem is being solved what challenges and barriers are expected and how they can be overcome Grassroots Sustainability - A Guide to Organizing a Thriving Community Lisa Chipkin,Pam Hartwell-Herrero,2012-03-05 Grassroots Sustainability was inspired by the real life efforts of a handful of grassroots groups in Marin County California that successfully brought sustainability policy and education to their communities This guidebook documents their best practices and shares important lessons learned along the way It is intended to empower individuals and grassroots groups near and far to facilitate meaningful change in their communities without having to reinvent the wheel publisher information
