Advanced Green Building:

Green and Smart Buildings Nilesh Y. Jadhav, 2016-10-01 This book highlights the various technologies that are currently available or are now being developed for the green and smart buildings of the future. It examines why green building performance is important and how it can be measured and rated using appropriate benchmarking systems. Lastly, the book provides an overview of the state of the art in green building technologies and the trend towards zero energy or net positive energy buildings in the future.

Green Building Illustrated Francis D. K. Ching, Ian M. Shapiro, 2020-11-19 FULLY ILLUSTRATED UPDATED GUIDE TO THE STRATEGIC DESIGN OF GREEN BUILDINGS In the tradition of *Building Construction Illustrated*, Francis D. K. Ching and Ian M. Shapiro offer a fully illustrated guide to the theory and practice of sustainable design. This guide provides architects, designers, and builders in the green design professional community a framework and detailed strategies for designing substantively green buildings. With a focus on sustainable sites, approaching and reaching net zero energy, low and zero water usage, minimum impact materials, and superior indoor environmental quality, this guide explains why we need to build green as well as green building theory and advancements in the industry. This Second Edition includes all new case studies featuring geographically diverse buildings with proven zero energy performance. Expanded coverage of zero energy building design as well as zero water and zero waste buildings. Practical guidance for the schematic design of high performance buildings, heating and hot water system selection, building envelope details, and integrating renewable energy. Advanced strategies such as the concept of shape efficiency and the optimal location for stairwells in buildings. Additional strategies for affordability in green design and construction. Updated references to the latest codes and standards. This Second Edition of *Green Building Illustrated* is an excellent resource for professionals, students, and those interested in the design and construction of sustainable buildings.

Greening Affordable Housing Abdullateef Olanrewaju, Zalina Shari, Zhonghua Gou, 2019-01-30 Books on green building theories, principles, and strategies applicable to life cycles of all kinds of buildings and building types are already widely available. However, those specifically on greening affordable housing that guide various housing stakeholders at different life cycles are still very limited. This book intends to fill this gap. Integrating green building enables stakeholders to address the environmental component that has not traditionally been seen as an integral part of affordable housing development. The book presents theories and principles with practical methods, strategies, and processes not only to make affordable housing green but also to support economic stability and social equity.
