Germany's Transient Pasts Rudy J.

Koshar, 2000-11-09 Over the course of the twentieth century Germans have venerated and maintained a variety of historical buildings from medieval fortresses and cathedrals to urban districts and nineteenth century working class housing But the practice of historic preservation has sometimes proven controversial as different groups of Germans have sought to use historical architecture to represent competing versions of their nation s history Transient Pasts is the first book to examine the role that the historic preservation movement has played in German cultural history and memory from the end of the nineteenth century to the early 1970s Focusing on key public debates over historic preservation Rudy Koshar charts a trajectory of cultural politics in which historical architecture both facilitated and limited Germans efforts to identify as a nation He demonstrates that historical buildings and monuments have served as enduring symbols of national history in a country scarred by the traumas of two world wars Nazism the Holocaust and political division His findings challenge both the widely accepted argument that Germans have constantly repressed their past and the contention that Germany s intense public engagement with history since reunification is unprecedented

Remembering Social Movements Stefan Berger, Sean Scalmer, Christian

Wicke, 2021-05-12 Remembering Social Movements offers a comparative historical examination of the relations between social movements and collective memory A detailed historiographical and theoretical review of the field introduces the reader to five key concepts to help guide analysis repertoires of contention historical events generations collective identities and emotions The book examines how social movements act to shape public memory as well as how memory plays an important role within social movements through 15 historical case studies spanning labour feminist peace anti nuclear and urban movements as well as specific examples of memory activism from the 19th century to the 21st century These include transnational and explicitly comparative case studies in addition to cases rooted in German Australian Indian and American history ensuring that the reader gains a real insight into the remembrance of social activism across the globe and in different contexts The book concludes with an epilogue from a prominent Memory Studies scholar Bringing together the previously disparate fields of Memory Studies and Social Movement Studies this book systematically scrutinises the two way

relationship between memory and activism and uses case studies to ground students while offering analytical tools for the reader Cities and Housing Chiranji S. Yadav, 1987 *How Green Became Good* Hillary Angelo, 2021-03-15 As projects like Manhattan's High Line Chicago's 606 China's eco cities and Ethiopia's tree planting efforts show cities around the world are devoting serious resources to urban greening Formerly neglected urban spaces and new high end developments draw huge crowds thanks to the considerable efforts of city governments But why are greening projects so widely taken up and what good do they do In *How Green Became Good* Hillary Angelo uncovers the origins and meanings of the enduring appeal of urban green space showing that city planners have long thought that creating green spaces would lead to social improvement Turning to Germany's Ruhr Valley a region that despite its ample open space was greened with the addition of official parks and gardens Angelo shows that greening is as much a social process as a physical one She examines three moments in the Ruhr Valley's urban history that inspired the creation of new green spaces industrialization in the late nineteenth century postwar democratic ideals of the 1960s and industrial decline and economic renewal in the early 1990s Across these distinct historical moments Angelo shows that the impulse to bring nature into urban life has persistently arisen as a response to a host of social changes and reveals an enduring conviction that green space will transform us into ideal inhabitants of ideal cities Ultimately however she finds that the creation of urban green space is more about how we imagine social life than about the good it imparts **Bürgerinitiativen und repräsentatives System** Udo Kempf, 2013-04-18
