Scott, 1987 In August 1983 a grassfire raged up Deep Ravine and across the dry grass covered battlefield where in 1876 men of the Seventh U S Cavalry under George Armstrong Custer had fought and died at the hands of a Sioux and Cheyenne force led by Sitting Bull The removal of the normally dense ground cover revealed enough evidence to suggest that an

archaeological survey would be fruitful and perhaps could address some unanswered questions about the battle Describing archaeological investigations during the first year 1984 of a two year survey this book offers a detailed analysis of the physical evidence remaining after the battle Precise information regarding the locations of artifacts and painstaking analyses of the artifacts themselves have uncovered much new information about the guns used in the battle by the victorious Indian warriors Not only have the types of guns been identified but through the use of archaeological and criminal investigative techniques the actual numbers of firearms can now be estimated This analysis of the battlefield which represents a significant advance in methodology shows that the two forces left artifacts in what can be defined as combatant patterns What did happen after Custer s trumpeter John Martin dispatched with an order for Captain Benteen to be quick turned and saw the doomed battalion for the last time Written to satisfy both professional and layman this book is a vital complement to the historical record **Archaeological Activities** Jack W. Papke,1995 *Soils in Archaeological Research* Vance T. Holliday,2004-08-19 Soils invaluable indicators of the nature and history of the physical and human landscape have strongly influenced the cultural record left to archaeologists In this book the author addresses each of these issues in terms of fundamentals as well as in field case histories from all over the world **Archaeological Perspectives on the Battle of the Little Bighorn** Douglas D. Scott,Richard A. Fox,Melissa A. Connor,Dick Harmon,2013-05-01 Ever since the Custer massacres on June 25 1876 the question has been asked What happened what REALLY happened at the Battle of the Little Bighorn We know some of the answers because half of George Armstrong Custer s Seventh Cavalry the men with Major Marcus Reno and Captain Frederick Benteen survived the fight but what of the half that did not the troopers civilians scouts and journalist who were with Custer Now because a grass fire in August 1983 cleared the terrain of brush and grass and made possible thorough archaeological examinations of the battlefield in 1984 and 1985 we have many answers to important questions On the basis of the archaeological evidence presented in this book we know more about what kinds of weapons were used against the cavalry We know exactly where many of the men fought how they died and what happened to their bodies at the time of or after death We know how the troopers were deployed what kind of clothing they wore what kind of equipment they had how they fought Through the techniques of historical archaeology and forensic anthropology the remains and grave of one of Custer s scouts Mitch Boyer have been identified And through geomorphology and the process of elimination we know with almost 100 percent certainty where the twenty eight missing men who supposedly were buried en masse in Deep Ravine will be found **Archaeologist's Fieldwork Guide** Barbara Ann Kipfer,2023-01-24 The new edition of the most comprehensive practical and user friendly guide of its kind providing quick reference to the information needed by archaeologists doing fieldwork The Archaeologist s Fieldwork Guide is the must have companion for anyone planning and performing fieldwork whether a student going into the field for the first time or a professional archaeologist with years of real world experience Designed to be an all in one informational toolkit the Guide is packed with the technical and practical
