Becoming Alcoholic Alcoholics Anonymous And The Reality Of Alcoholism:

Becoming Alcoholic David R. Rudy, 1986 Affiliation with Alcoholics Anonymous parallels religious conversion according to David R Rudy in this timely study of the most famous self help organization in the world Drinkers who commit themselves to Alcoholics Anonymous embrace the radically different life style the altered world of the convert To understand this conversion and more important to get a grip on the even deeper mystery of alcoholism itself Rudy sought to answer these three questions What processes are involved in becoming alcoholic How does the alcoholic affiliate with and become committed to A A s belief system What is the relation ship between the world of A A members and that constructed by alcoholologists Rudy establishes the history and structure of A A and examines the organization s relationship to dominant sociological models theories and definitions of alcoholism

Gay Men, Drinking, and Alcoholism Thomas S. Weinberg, 1994 Alcohol use is an integral part of the gay world According to some estimates the rate of problem drinking is about three times higher among gays than in mainstream society but few researchers have examined this phenomenon in depth Thomas S Weinberg s ethnographic study provides new insight into the role of drinking in the gay male community Weinberg utilizes interviewing and participant observation techniques in a variety of drinking related settings in the gay subculture of Paradise City the fictitious name of a large western city where he carried out his research Emphasizing drinking as social behavior Weinberg explores the ways social contexts such as bars love relationships and reference groups affect individual drinking patterns and concludes that drinking is intimately entwined with friendship networks and extended families in the gay world Weinberg is concerned not only with alcoholism but with variation in alcohol use and changes in alcohol use over time He employs the concept of career to explain why and how an individual s drinking might either increase or decrease over the course of his lifetime Letting his informants speak for themselves Weinberg directs attention to their own perspectives on the meaning of their drinking behavior After creating a typology of drinkers including self defined as well as researcher defined alcoholics Weinberg considers alternative explanations for gay problem drinking He thoroughly explores the gay bar scene its importance in gay life and the way that interactions within the bar environment affect drinking and risk taking specifically as they relate to HIV Weinberg also looks closely at self defined gay alcoholics and considers three alternative explanations for gay problem drinking the alienation thesis the influence of parental role models and reference group theory He rejects the alienation thesis and the influence of parental role models because these causal factors were not borne out by his statistical correlations Instead Weinberg finds the most powerful explanation in reference group theory which links individuals behavior to the norms of the social groups they identify with Finally he arrives at a processual model of gay problem drinking based on his data analysis By comparing alcohol use in the homosexual and heterosexual communities Weinberg provides a new perspective on gay problem drinking that will interest sociologists psychologists and clinicians as well as concerned lay readers in the gay community He cites examinations of large scale survey research on tavern

attendance and drinking ethnographic studies of bar behavior literature on special groups and studies of marital interaction in alcoholic families concluding that gay drinking is a special situation that only reference group theory and a processual model adequately address The closing chapter contains policy recommendations for reducing alcohol use in the gay community

Recent Developments in Alcoholism Marc Galanter, 1989-01-31 From the President of the Research Society on Alcoholism In the last decade research concerning the causes and consequences of alcohol abuse and alcoholism has come of age We have witnessed a plethora of scientific findings that have shed light on some of the actions of alcohol at the molecular level Interesting new data have been forthcoming on the complexities of the development of tolerance to alcohol It is becoming increasingly appropriate to consider that tolerance to alcohol involves biological as well as psychological factors New scientific insights have been gained concerning the treatment of withdrawal as well as the presence of persistent withdrawal signs that may possibly be involved with relapse More recently new and compelling data indicating that alcoholism is a common familial disorder have appeared Clinical studies indicate that alcoholism is a heterogeneous disorder with multiformity in clinical symptomatology and genetic heterogeneity The heterogeneity of the clinical features and the heritability of the predisposing factors of alcoholism are currently under vigorous scientific investigation In the past several years sophisticated psychosocial studies have provided fundamental information on subjects at high risk for alcoholism Psychosocial and biological studies of families including alcoholics and subjects at high risk are likely to bring new insights to our understanding of etiological factors Moreover as a result of these studies we stand to develop better prevention initiatives and treatment approaches
