Bedlam Planet:

Bedlam Planet John Brunner, 2011-09-29 Everything about the planet revolving about Sigma Draconis seemed to indicate that here was a world that could be made into a second Earth It was fertile and lacked native inhabitants and dangerous beasts Then what was troubling the pioneer colony that had landed and set up shop there Was it really possible just to create a new Earth on any vacant world waiting a landing Or was there a lot more to planetary ecologies than humanity realized

Bedlam Planet John Brunner, 1968 *Manshape* John Brunner, 2011-09-29 The interstellar Bridge System was the greatest invention in the long history of cosmic humanity Spread through dozens of planets men and their societies had drifted apart in isolation until the Bridge came to link together humanity's multifold worlds and had affirmed once more that all men were brothers and sisters under the skin But the far away world of Azreal was the exception the one dissident world that refused the Bridge It became the task of two agents a man and a woman to bring Azreal back into manshape unity to ferret out the hidden reasons for the stubborn refusal The problem with its perils and high risks was to involve more than just secrets for Manshape is John Brunner novel that deals with the very fabric of civilization *The Mammoth Encyclopedia of Science Fiction* George Mann, 2012-03-01 This encyclopedia is the most up to date concise clear and affordable guide to all aspects of science fiction from its background to generic themes and devices from authors established and new to films Science fiction has evolved into one of the most popular cutting edge and exciting fiction genres with a proliferation of modern and classic authors themes and ideas movies TV series and awards Arranged in an A Z format and featuring a comprehensive index and cross referencing system The Mammoth Encyclopedia of Science Fiction is also the most accessible and easy to use encyclopedia of its kind currently available **Voices for the Future** Thomas D. Clareson, 1979 Essays on major science fiction writers **The Tides of Time** John Brunner, 2012-12-21 First there was the end After weeks of running from pursuers Gene and Stacy finally found refuge on an isolated island But around them the island changed and so did they Each time they awoke from sleep they lived a different life in a different time And the farther back they went the more they lost their anchor to their own world When at last they were found the people they had become no longer recognised their pursuers And that was the beginning *Sanctuary in the Sky* John Brunner, 2013-08-29 A cold war among the stars was growing hotter by the minute As Pag and Cathrodyne struggled for domination a hot war threatened which would rend and annihilate whole planetary systems The two master races would have consumed one another long ago but for one single factor Waystation It was a stupendous synthetic world famed throughout this galaxy For Waystation was controlled by a neutral people and until the greater powers could seize this strategic wonder planet and ferret out its secrets they were doomed to fretful inactivity But as a Cathrodyne vessel drew near to Waystation the all important balance of power stood in sudden peril The ship in itself was routine But on board was a stranger a man of undiscovered race who spoke too little and it appeared knew too much *Ecocritical Explorations in Literary and Cultural Studies* Patrick D.

Murphy,2009-07-15 In *Ecocritical Explorations* Patrick D Murphy explores environmental literature and environmental cultural issues through both theoretical and applied criticism He engages with the concepts of referentiality simplicity the nation state and virtual reality in the first section of the book and then goes on to interrogate these issues in contemporary environmental literature both American and international He concludes his argument with a discussion of the larger frames of family dynamics and un natural disasters such as hurricanes and global warming ending with a chapter on the integration of scholarship and pedagogy in the classroom with reference to his own teaching experiences Murphy s study provides a wide ranging discussion of contemporary literature and cultural phenomena through the lens of ecological literary criticism giving attention to both theoretical issues and applied critiques In particular he looks at popular literary genres such as mystery and science fiction as well as actual disasters and disaster scenarios *Ecocritical Explorations in Literary and Cultural Studies* is a timely contribution to ecological literary criticism and an insightful look into how we represent our relationship with the environment

The Infinitive of Go John Brunner,2012-07-16 CODE NAME POSTER The first practical matter transmitter was a success or so everyone thought In spite of paranoid security restrictions Justin Williams and Cinnamon Wright co inventors of the device counted on it to revolutionise civilisation and gain them an honoured place in history But the first long distance field test with a human being a diplomatic courier carrying a vital message somehow misfired when the courier killed himself on arrival at his destination To prove his faith in his invention and to escape charges of sabotage Justin had himself posted thousands of miles He came through unchanged It was the world that was somehow different

German Ecocriticism in the Anthropocene Caroline Schaumann,Heather I. Sullivan,2017-04-18 This book offers essays on both canonical and non canonical German language texts and films advancing ecocritical models for German Studies and introducing environmental issues in German literature and film to a broader audience This volume contextualizes the broad ranging topics and authors in terms of the Anthropocene beginning with Goethe and the Romantics and extending into twenty first century literature and film Addressing the growing need for environmental awareness in an international humanities curriculum this book complements ecocritical analyses emerging from North American and British studies with a specifically German Studies perspective opening the door to a transnational understanding of how the environment plays an integral role in cultural political and economic issues
