Arabia Felix The Danish Expedition Of 17:

Arabia Felix Thorkild Hansen, 2017-06-13 Discover the riveting true story of the 18th century expedition that left only one survivor in this lost classic of adventure and travel writing with 33 drawings and maps Arabia Felix is the spellbinding true story of a scientific expedition gone disastrously awry On a winter morning in 1761 6 men leave Copenhagen by sea a botanist a philologist an astronomer a doctor an artist and their manservant an ill assorted band of men who dislike and distrust one another from the start These are the members of the Danish expedition to Arabia Felix as Yemen was then known the first organized foray into a corner of the world unknown to Europeans The expedition made its way to Turkey and Egypt by which time its members were already actively seeking to undercut and even kill one another before disappearing into the harsh desert that was their destination Nearly 7 years later a single survivor returned to Denmark to find himself forgotten and all the specimens that had been sent back ruined by neglect Based on diaries notebooks and sketches that lay unread in Danish archives until the twentieth century Arabia Felix is a tale of intellectual rivalry and a comedy of very bad manners as well as an utterly absorbing adventure

Language and Enlightenment Avi Lifschitz, 2012-09-28 What is the role of language in human cognition Could we attain self consciousness and construct our civilization without language Such were the questions at the basis of eighteenth century debates on the joint evolution of language mind and culture Language and Enlightenment highlights the importance of language in the social theory epistemology and aesthetics of the Enlightenment While focusing on the Berlin Academy under Frederick the Great Avi Lifschitz situates the Berlin debates within a larger temporal and geographical framework He argues that awareness of the historicity and linguistic rootedness of all forms of life was a

mainstream Enlightenment notion rather than a feature of the so called Counter Enlightenment Enlightenment authors of different persuasions investigated whether speechless human beings could have developed their language and society on their own Such inquiries usually pondered the difficult shift from natural signs like cries and gestures to the artificial articulate words of human language This transition from nature to artifice was mirrored in other domains of inquiry such as the origins of social relations inequality the arts and the sciences By examining a wide variety of authors Leibniz Wolff Condillac Rousseau Michaelis and Herder among others Language and Enlightenment emphasises the open and malleable character of the eighteenth century Republic of Letters The language debates demonstrate that German theories of culture and language were not merely a rejection of French ideas New notions of the genius of language and its role in cognition were constructed through a complex interaction with cross European currents especially via the prize contests at the Berlin Academy
