Archaeological Studies Of Gender In The Southeastern United States:

Archaeological Studies of Gender in the Southeastern United States Jane M. Eastman, Christopher Bernard Rodning, 2001 In the first book about the archaeology of gender in native societies of southeastern North America these lively essays reconstruct the different social roles and relationships adopted by women and men before and after the arrival of Europeans in the 16th century

Archaeological Studies of Gender in the Southeastern United States Jane M. Eastman, Christopher B. Rodning, 2009-09-24 This book begins the attempt to answer many of the archaeological questions we are finally asking about the long ignored but crucially important and ever present social roles of gender among native Americans in the Southeast Nancy Marie White University of South Florida coeditor of *Grit Tempered Early Women Archaeologists in the Southeastern United States* In the first book about the archaeology of gender in native societies of southeastern North America these lively essays reconstruct the different social roles and relationships adopted by women and men before and after the arrival of Europeans in the 16th century Case studies explore the ways in which gender differences affected people's daily lives by examining material evidence from archaeological sites including grave goods human remains spatial configurations of burials and architecture and evidence for economic specialization and the division of labor within households Contents Introduction Gender and the Archaeology of the Southeast by Christopher B Rodning and Jane M Eastman 1 Challenges for Regendering Southeastern Prehistory by Cheryl Claassen 2 The Gender Division of Labor in Mississippian Households Its Role in Shaping Production for Exchange by Larissa Thomas 3 Life Courses and Gender among Late Prehistoric Siouan Communities by Jane M Eastman 4 Mortuary Ritual and Gender Ideology in Protohistoric Southwestern North Carolina by Christopher B Rodning 5 Those Men in the Mounds Gender Politics and Mortuary Practices in Late Prehistoric Eastern Tennessee by Lynne P Sullivan 6 Piedmont Siouans and Mortuary Archaeology on the Eno River North Carolina by Elizabeth I Monahan Driscoll R P Stephen Davis Jr and H Trawick Ward 7 Auditory Exostoses A Clue to Gender in Prehistoric and Historic Farming Communities of North Carolina and Virginia by Patricia M Lambert 8 Concluding Thoughts by Janet E Levy Jane M Eastman is visiting assistant professor of anthropology at East Carolina University Christopher B Rodning is a doctoral candidate in the Department of Anthropology at the University of North Carolina Chapel Hill

Archaeological Perspectives on the Southern Appalachians Ramie A. Gougeon, Maureen Meyers, 2015-03-10 This volume demonstrates how archaeologists working in the Southern Appalachian region over the past 40 years have developed rich interpretations of prehistoric and historic Southeastern Native societies by examining them from multiple scales of analysis The end results of these examinations demonstrate both the uses and the constraints of multiscale approaches in reconstructing various lifeways across the Southeast

The Archaeology of Town Creek Edmond A. Boudreaux, III, 2007-11-04 Provides new insights into the community pattern and leadership roles at a major Mississippian archaeological site The sequence of change for public architecture during the Mississippian period may reflect a

centralization of political power through time In the research presented here some of the community level assumptions attributed to the appearance of Mississippian mounds are tested against the archaeological record of the Town Creek site the remains of a town located on the northeastern edge of the Mississippian culture area In particular the archaeological record of Town Creek is used to test the idea that the appearance of Mississippian platform mounds was accompanied by the centralization of political authority in the hands of a powerful chief A compelling argument has been made that mounds were the seats and symbols of political power within Mississippian societies While platform mounds have been a part of Southeastern Native American communities since at least 100 B C around A D 400 leaders in some communities began to place their houses on top of earthen mounds an act that has been interpreted as an attempt to legitimize personal authority by a community leader through the appropriation of a powerful traditional community oriented symbol Platform mounds at a number of sites were preceded by a distinctive type of building called an earthlodge a structure with earth embanked walls and an entrance indicated by short parallel wall trenches Earthlodges in the Southeast have been interpreted as places where a council of community leaders came together to make decisions based on consensus In contrast to the more inclusive function proposed for pre-mound earthlodges it has been argued that access to the buildings on top of Mississippian platform mounds was limited to a much smaller subset of the community If this was the case and if ground level earthlodges were more accessible than mound summit structures then access to leaders and leadership may have decreased through time Excavations at the Town Creek archaeological site have shown that the public architecture there follows the earthlodge to platform mound sequence that is well known across the South Appalachian subarea of the Mississippian world The clear changes in public architecture coupled with the extensive exposure of the site's domestic sphere make Town Creek an excellent case study for examining the relationship among changes in public architecture and leadership within a Mississippian society

Gender in Archaeology Sarah Milledge Nelson, 2004-03-15 This new edition of the first comprehensive feminist theoretical synthesis of the archaeological work on gender reflects the extensive changes in the study of gender and archaeology over the past 8 years New issues such as sexuality studies the body children and feminist pedagogy enrich this edition while the author updates work on the roles of women and men in such areas as human origins the sexual division of labor kinship and other social structures state development and ideology Nelson provides examples from gender specific archaeological studies worldwide to examine such traditional myths as woman the gatherer the goddess hypothesis and the Amazon warriors replacing them with a more nuanced informed treatment of gender based on the latest research She also examines the structure of the archaeology in her attempt to understand and change a discipline that has made women all but invisible both as researchers and objects of research Honored as a Choice Magazine Outstanding Academic Book Nelson's work will continue to be the benchmark for archaeologists interested in gender as a subject of research and in the profession

The Oxford Encyclopedia of Women in World History Bonnie G. Smith,2008 The Encyclopedia of Women in World History captures the experiences of women throughout world history in a comprehensive 4 volume work Although there has been extensive research on women in history by region no text or reference work has comprehensively covered the role women have played throughout world history The past thirty years have seen an explosion of research and effort to present the experiences and contributions of women not only in the Western world but across the globe Historians have investigated womens daily lives in virtually every region and have researched the leadership roles women have filled across time and region They have found and demonstrated that there is virtually no historical social or demographic change in which women have not been involved and by which their lives have not been affected The Oxford Encyclopedia of Women in World History benefits greatly from these efforts and experiences and illuminates how women worldwide have influenced and been influenced by these historical social and demographic changes The Encyclopedia contains over 1 250 signed articles arranged in an A Z format for ease of use The entries cover six main areas biographies geography and history comparative culture and society including adoption abortion performing arts organizations and movements such as the Egyptian Uprising and the Paris Commune womens and gender studies and topics in world history that include slave trade globalization and disease With its rich and insightful entries by leading scholars and experts this reference work is sure to be a valued go to resource for scholars college and high school students and general readers alike **Extracting Stone** Anne S. Dowd,Mary

Beth D. Trubitt,2024-04-04 A comprehensive view of quarrying activities from three key regions in North America This exciting new addition to the the American Landscapes series provides an in depth account of how flintknappers obtained and used stone based on archaeological geological landscape and anthropological data Featuring case studies from three key regions in North America this book gives readers a comprehensive view of quarrying activities ranging from extracting the raw material to creating finished stone tools Quarry landscapes were some of the first large scale land modification efforts among early peoples in the New World The chronological time periods covered by quarrying activities show that most intensive use took place during parts of the Archaic and Woodland periods or between roughly 4000 1000 years ago when denser populations existed but use began as early as the Paleoindian Period about 13 000 9000 years ago and ended in the Historic or Protohistoric periods when colonists and Native Americans mined chert for gunflints and sharpening stones or abrasives From the procurement systems approach common in the 1980s and 1990s archaeologists can now employ a

landscape approach to quarry studies in tandem with Geographic Information Systems GIS computer mapping and digital analysis Light and RADAR LiDAR airborne laser scanning for recording topography or high resolution satellite imagery Authors Dowd and Trubitt show how sites functioned in a broad landscape context which site locations or raw material types were preferred and why what cultures were responsible for innovative or intensive quarry resource extraction as well as how land use changed over time Besides discussions of the way that industrialists used natural resources to change their technology by means of manufacture trade and exchange examples are given of heritage sites that people can visit in the United States and Canada

Ancient Households of the Americas John G. Douglas, Nancy Douglas, 2012-04-15 In *Ancient Households of the Americas* archaeologists investigate the fundamental role of household production in ancient colonial and contemporary households Several different cultures Iroquois Coosa Anasazi Hohokam San Agust n Wankarani Formative Gulf Coast Mexico and Formative Classic Colonial and contemporary Maya are analyzed through the lens of household archaeology in concrete data driven case studies The text is divided into three sections Section I examines the spatial and social organization and context of household production Section II looks at the role and results of households as primary producers and Section III investigates the role of and interplay among households in their greater political and socioeconomic communities In the past few decades household archaeology has made substantial contributions to our understanding and explanation of the past through the documentation of the household as a social unit whether small or large rural or urban commoner or elite These case studies from a broad swath of the Americas make *Ancient Households of the Americas* extremely valuable for continuing the comparative interdisciplinary study of households
