Artificial Intelligence And Other Innovative Computer Applications In The Nuclear Industry:

Artificial Intelligence and Other Innovative Computer Applications in the Nuclear Industry M. Catherine Majumdar, 2012-12-06 This conference brought together experts from 15 countries to discuss application of Artificial Intelligence AI techniques to the nuclear industry It was apparent from the meeting that even those active in the field were surprised at the extent of work and the progress made There was a strong impression that application of this technology to nuclear power plants is inevitable The benefits to improved operation design and safety are simply too significant to be ignored This is a much different conclusion than might have been reached a few years ago when the technology was new and people were struggling to understand its significance We believe that this meeting reflects a major turning point for the technology It has moved from being a topic understood only by specialists to a situation where users are the most active people in the field A broad array of innovative work is described from all of the participating countries The activity in the U S is large and diverse Although there is no nationally focussed policy for AI research in the U S many of these activities are reported here Japan and France have a strong drive to integrate AI technology into their nuclear plants and this is reflected in these proceedings

Autonomous Nuclear Power Plants with Artificial Intelligence Jonghyun Kim, Seungjun Lee, Poong Hyun Seong, 2023-02-20 This book introduces novel approaches and practical examples of autonomous nuclear power plants that minimize operator intervention Autonomous nuclear power plants with artificial intelligence presents a framework to enable nuclear power plants to autonomously operate and introduces artificial intelligence AI techniques to implement its functions Although nuclear power plants are already highly automated to reduce human errors and guarantee the reliability of system operations the term autonomous is still not popular because AI techniques are regarded as less proven technologies However the use of AI techniques and the autonomous operation seems unavoidable because of their great advantages especially in advanced reactors and small modular reactors The book includes the following topics Monitoring diagnosis and prediction Intelligent control Operator support systems Operator autonomous system interaction Integration into the autonomous operation system This book will provide useful information for researchers and students who are interested in applying AI techniques in the fields of nuclear as well as other industries This book covers broad practical applications of AI techniques from the classical fault diagnosis to more recent autonomous control In addition

specific techniques and modelling examples are expected to be very informative to the beginners in the AI studies

Artificial Intelligence and Other Innovative Computer Applications in the Nuclear Industry American Nuclear Society,. Idaho Section, American Nuclear Society topical meeting, 1987 *Nuclear Safety* ,1987 *Expert Systems Applications Within the Nuclear Industry* John A. Bernard, Takashi Washio, 1989 This monograph provides both a compilation and a critical review of the ways expert systems can be applied to the design management and operation of research test and commercial power reactors The applications are identified and assessed relative to the capability of the technology Specific systems are also examined in detail Almost 300 expert systems are described grouped under more than 60 different applications The Industrial Electronics Handbook J. David Irwin, 1997-05-09 From traditional topics that form the core of industrial electronics to new and emerging concepts and technologies The Industrial Electronics Handbook in a single volume has the field covered Nowhere else will you find so much information on so many major topics in the field For facts you need every day and for discussions on topics you have only dreamed of The Industrial Electronics Handbook is an ideal reference *Regulating Artificial Intelligence in Industry* Damian M. Bielicki, 2021-12-23 Artificial Intelligence AI has augmented human activities and unlocked opportunities for many sectors of the economy It is used for data management and analysis decision making and many other aspects As with most rapidly advancing technologies law is often playing a catch up role so the study of how law interacts with AI is more critical now than ever before This book provides a detailed qualitative exploration into regulatory aspects of AI in industry Offering a unique focus on current practice and existing trends in a wide range of industries where AI plays an increasingly important role the work contains legal and technical analysis performed by 15 researchers and practitioners from different institutions around the world to provide an overview of how AI is being used and regulated across a wide range of sectors including aviation energy government healthcare legal maritime military music and others It addresses the broad range of aspects including privacy liability transparency justice and others from the perspective of different jurisdictions Including a discussion of the role of AI in industry during the Covid 19 pandemic the chapters also offer a set of recommendations for optimal regulatory interventions Therefore this book will be of interest to academics students and practitioners interested in technological and regulatory aspects of AI *Fuzzy Logic And Intelligent Technologies In Nuclear Science - Proceedings Of The 1st International Woksp Flins '94* Da Ruan, Paul Govaerts, Etienne E Kerre, Pierre D'hondt, 1994-08-31 Key issues in applied and fundamental research related to Fuzzy Logic and Intelligent Technologies in the nuclear industry and related fields were addressed by the above workshop The papers in this volume were carefully selected from a large number of contributions and cover applications in radiation protection nuclear safety human factors and reliability safeguards nuclear power plant control decision making and nuclear reactor control The papers are categorised into three groups namely mathematics basic tools for the treatment of fuzzy logic engineering knowledge based engineering expert systems etc and nuclear science
