Artificial Wilderness:

Artificial Wilderness Mandy-Suzanne Wong, 2020 *An Artificial Wilderness* Sven Birkerts, 1987 Natural Visions Finis Dunaway, 2016-12-20

Walden Pond The Grand Canyon Yosemite National Park Throughout the twentieth century photographers and filmmakers created unforgettable images of these and other American natural treasures Many of these images including the work of Ansel Adams continue to occupy a prominent place in the American imagination Making these representations though was more than a purely aesthetic project In fact portraying majestic scenes and threatened places galvanized concern for the environment and its protection *Natural Visions* documents through images the history of environmental reform from the Progressive era to the first Earth Day celebration in 1970 showing the crucial role the camera played in the development of the conservation movement In *Natural Visions* Finis Dunaway tells the story of how visual imagery such as wilderness photographs New Deal documentary films and Sierra Club coffee table books shaped modern perceptions of the natural world By examining the relationship between the camera and environmental politics through detailed studies of key artists and activists Dunaway captures the emotional and spiritual meaning that became associated with the American landscape Throughout the book he reveals how photographers and filmmakers adapted longstanding traditions in American culture the Puritan jeremiad the romantic sublime and the frontier myth to literally picture nature as a place of grace for the individual and the nation Beautifully illustrated with photographs by Ansel Adams Eliot Porter and a host of other artists *Natural Visions* will appeal to a wide range of readers interested in American cultural history the visual arts and environmentalism

EcoGothic Andrew Smith, William Hughes, 2015-11-01 This book will provide the first study of how the Gothic engages with ecocritical ideas Ecocriticism has frequently explored images of environmental catastrophe the wilderness the idea of home constructions of nature and images of the post apocalypse images which are also central to a certain type of Gothic literature By exploring the relationship between the ecocritical aspects of the Gothic and the Gothic elements of the ecocritical this book provides a new way of looking at both the Gothic and ecocriticism Writers discussed include Ann Radcliffe Mary Shelley Ambrose Bierce Algernon Blackwood Margaret Atwood Cormac McCarthy Dan Simmons and Rana Dasgupta The volume thus explores writing and film across various national contexts including Britain America and Canada as well as giving due consideration to how such issues might be discussed within a global context

Joshua Tree National Park (N.P.) General Management Plan (GMP) and Development Concept Plans, 1999 **Acts of Narrative** Carol Jacobs, Henry Sussman, 2003 This outstanding collection brings together essays that reflect on the nature of narrative literary criticism and history from a variety of theoretical and disciplinary perspectives ranging from deconstruction psychoanalysis and trauma theory to narratology technology economics and aesthetics *Acts of Narrative* includes responses from renowned scholars across a wide range of disciplines philosopher Jacques Derrida the literary critic J Hillis Miller W J T Mitchell well known for his reflections on the visual world and Cathy Caruth one of the founders of the field of trauma theory These essays

are brilliant in their readings of other texts but are also striking in the manner in which each becomes itself a narrative performance Moreover what starts out as an exercise in theorizing and reading moves more often than not into a meditation on social and political issues crucial for our own sense of ourselves **Philosophy and Biodiversity** Markku

Oksanen, Juhani Pietarinen, 2004-09-06 This important collection focuses on the nature and importance of biodiversity The concept is clarified and its intrinsic and instrumental value are discussed Even though the term biodiversity was invented in the 1980s to promote the cause of species conservation discussions on biological diversity go back to Plato There are many controversies surrounding biodiversity and a few of them are examined here What is worthy of protection or restoration and what is the acceptable level of costs Is it permissible to kill sentient animals to promote native populations Can species be reintroduced if they have disappeared a long time ago How should the responsibilities for biodiversity be shared This book will be of interest to philosophers of science and biologists but also to anyone interested in conservation and the environment

1491 (Second Edition) Charles C. Mann, 2006-10-10 NATIONAL BESTSELLER A groundbreaking work of science history and archaeology that radically alters our understanding of the Americas before the arrival of Columbus in 1492 from a remarkably engaging writer The New York Times Book Review Contrary to what so many Americans learn in school the pre Columbian Indians were not sparsely settled in a pristine wilderness rather there were huge numbers of Indians who actively molded and influenced the land around them The astonishing Aztec capital of Tenochtitlan had running water and immaculately clean streets and was larger than any contemporary European city Mexican cultures created corn in a specialized breeding process that it has been called man's first feat of genetic engineering Indeed Indians were not living lightly on the land but were landscaping and manipulating their world in ways that we are only now beginning to understand Challenging and surprising this a transformative new look at a rich and fascinating world we only thought we knew

Questioning Technology with Jacques Ellul David W. Gill, Lisa Richmond, 2025-10-07 Twenty first century technology is an ever expanding powerful force in virtually every aspect of human life and every corner of the globe So much of modern technology has resulted in positive improvements in communication work health and other domains Technology's promises and possibilities for the future are often glowing But it is one thing for technology to function as a tool serving human purpose and flourishing and quite another for it to be granted the position of unquestioned master All technologies deserve to be questioned What are their costs trade offs and potential or real negative impact And how do we create limits and controls for technological invasion when these would be wise and necessary Questioning Technology with Jacques Ellul addresses these questions in both the big picture and in their relevance to specific arenas such as art politics work and religion with voices from not just the academy but also the workplace and society The Forest and the EcoGothic Elizabeth Parker, 2020-02-13 This book offers the first full length study on the pervasive archetype of The Gothic Forest in Western culture The idea of the forest as deep dark and dangerous has an extensive history and continues to resonate throughout

contemporary popular culture *The Forest and the EcoGothic* examines both why we fear the forest and how exactly these fears manifest in our stories. It draws on and furthers the nascent field of the ecoGothic which seeks to explore the intersections between ecocriticism and Gothic studies. In the age of the Anthropocene, this work importantly interrogates our relationship to and understandings of the more than human world. This work introduces the trope of the Gothic forest as well as important critical contexts for its discussion and examines the three main ways in which this trope manifests as a living animated threat as a traditional habitat for monsters and as a dangerous site for human settlement. This book will appeal to students and scholars with interests in horror and the Gothic, ecohorror and the ecoGothic, environmentalism, ecocriticism and popular culture more broadly. The accessibility of the subject of *The Deep Dark Woods* coupled with increasingly mainstream interests in interactions between humanity and nature means this work will also be of keen interest to the general public.
