Microalgae Building Enclosures Kyoung Hee Kim, 2022-03-30 Microalgae architecture has gained awareness for its biotechnical potential to achieve net zero

energy architecture while also promoting ecological sustainability and occupant well being Microalgae Building Enclosures Design and Engineering Principles aims to provide design engineering and biotechnical guidelines for microalgae building enclosures that need to be considered for symbiotic relations among the built environment humans and ecosystems Part I of the book introduces the theoretical background of microalgae as a bioremediator and future energy system and their potential roles toward sustainable and healthy built environments Part II exemplifies interventions and multiple benefits of microalgae systems in product architecture urban and infrastructure applications across the globe including Africa Asia Australia Europe South America and North America Part III explains the design and engineering criteria biotechnical design requirements and various performance metrics for microalgae architecture Finally Part IV investigates potential building applications in low rise buildings high rise buildings and energy efficient retrofitting The book also includes international case studies of microalgae building systems within various building types and climates As one of the first books to comprehensively cover this emerging area of microalgae building enclosures Microalgae Building Enclosures is an essential source for professionals and students looking to expand architectural discourse on nature integrated building systems to achieve the triple bottom line of sustainability

Advances in Geology and Resources Exploration Ahmad Safuan Bin A Rashid, Shiqi Huang, 2022-09-19 Advances in Geology and Resources Exploration provides a collection of papers resulting from the conference on Geology and Resources Exploration ICGRED 2022 Harbin China 21 23 January 2022 The primary goal of the conference is to promote research and developmental activities in geology resources exploration and development and another goal is to promote scientific information interchange between scholars from the top universities business associations research centers and high tech enterprises working all around the world The conference conducted in depth exchanges and discussions on relevant topics such as geology resources exploration aiming to provide an academic and technical communication platform for scholars and engineers engaged in scientific research and engineering practice in the field of engineering geology geological resources and geothermal energy By sharing the status of scientific research achievements and cutting edge technologies this helps scholars and engineers all over the world to comprehend the academic development trend and to broaden research ideas With a view to strengthen international academic research academic topics exchange and discussion and promoting the industrialization cooperation of academic achievements

Biochar and the Circular Economy Hrudayanath Thatoi, Shibani Mohapatra, Ashok Pandey, Lam Su Shiung, 2026-02-20 This book provides a comprehensive overview of biochar as a sustainable solution within the context of agriculture waste management environmental remediation and the circular economy The initial chapters introduce the concept of biochar and its alignment with circular economic principles and presents the mechanisms of action and multifunctional benefits across different sectors The chapters explore innovative biochar production techniques using agricultural residues food waste and municipal sludge highlighting efficiency scalability and environmental impact The book also details the application of biochar

in soil enhancement wastewater treatment and bioenergy systems including biogas and biohydrogen production The final chapters emphasize the pivotal role of biochar in carbon sequestration and climate change mitigation solidifying its relevance to global sustainability goals

Key Features Explains the concept of biochar within the framework of the circular economy and sustainable development Details innovative production techniques using various biomass feedstocks including agricultural waste food scraps and sewage sludge Explores agricultural applications such as improving soil structure fertility and crop yield Presents industrial uses of biochar in removing contaminants like heavy metals and dyes from wastewater Highlights its role in anaerobic digestion and renewable energy especially in biogas and hydrogen generation This book is useful for researchers and professionals of biotechnology and environmental sciences

Pathways to a Hydrogen Future Thomas E Drennen, Jennifer E Rosthal, 2007-08-29 Hydrogen may someday fuel our cars and power and heat our homes and businesses and revolutionize the way we use energy Moving to a hydrogen economy could help reduce our reliance on foreign oil improve local air quality and reduce the risk of climate change Despite the potential of hydrogen there is no guarantee that the hydrogen economy will happen as the obstacles are considerable and the competing visions are many Pathways to a Hydrogen Future seeks to untangle the competing visions of a hydrogen economy explain the trade offs and obstacles and offer recommendations for a path forward The results are based on a detailed simulation model developed at Sandia National Laboratories The Hydrogen Futures Simulation Model H2Sim The H2Sim is a high level strategic tool for evaluating the economic and environmental trade offs of alternative hydrogen production storage transport and end use options in the year 2020 An executive version of H2Sim is included with the book allowing readers to explore the various scenarios discussed H2Sim s ease of use and its ability to provide answers to these types of questions make it a powerful educational and policy making tool The model s structure is ideal for exploring what if questions such as Can fuel cell vehicles FCVs compete economically with current cars if the FCVs are 2.5 times as efficient Should the hydrogen be produced at fueling stations or at central locations and transported to fueling stations Includes an executive version of H2Sim allowing readers to explore the various scenarios discussed H2Sim s ease of use and ability to provide answers makes it a powerful educational and policy making tool The model s structure is ideal for exploring what if questions such as Can fuel cell vehicles FCVs compete economically with current cars if the FCVs are 2.5 times as efficient Should the hydrogen be produced at fueling stations or at central locations and transported to fueling stations

Proceedings of the 2023 4th International Conference on Management Science and Engineering Management (ICMSEM 2023) Suhaiza Hanim Binti Dato Mohamad Zailani, Kosga Yagapparaj, Norhayati Zakuan, 2023-10-07 This is an open access book Management science aims to study the dynamic study of human use of limited resources in management activities to achieve organizational goals complex and innovative social behavior and its laws And engineering management refers to the management of important and complex new products equipment and devices in the process of development manufacturing and production and also includes the study and

management of technological innovation technological transformation transformation layout and strategy of industrial engineering technology development The development or breakthrough of management theory is accompanied by the development and progress of science and technology and the level of science and technology and the level of management theory in each historical period are mutually adaptive and it can be said that the progress of science and technology plays an important role in promoting the development of management At the same time the rapid development and progress of science and technology give a strong injection to the development of engineering and provide the possibility for engineering construction can use new technology new equipment new technology and new materials Modern management is an important development direction of management science nowadays And the use of modern management in engineering has an important role in saving social costs ensuring project quality and improving safety awareness and behavior ICMSEM 2023 will focus on modern management discuss about the benefits that modernization brings to engineering ICMSEM 2023 aims to Develop and advance management science through the study and application of certain issues Open up new perspectives in the sharing of speakers and inspire the audience to new ways of managing in engineering Create a forum for sharing research and exchange at the international level so that the participants can be informed of the latest research directions results and contents of management science which will inspire them to new ideas for research and practice Policies for a Carbon-Neutral Industry in the Netherlands OECD,2021-10-15 This report presents a comprehensive assessment of the policy instruments adopted by the Netherlands to reach carbon neutrality in its manufacturing sector by 2050 The analysis illustrates the strength of combining a strong commitment to raising carbon prices with ambitious technology support uncovers the pervasiveness of competitiveness provisions and highlights the trade off between short term emissions cuts and longer term technology shift *Energy Sustainability and Climate Change in ASEAN* Han Phoumin,Farhad Taghizadeh-Hesary,Fukunari Kimura,Jun Arima,2021-07-15 This book provides several up to date empirical policy oriented studies on assessing the impacts of climate change on various economic sectors and the role of renewable energy resources in mitigating pollution and climate change It suggests various policy recommendations on how to increase the share of renewable energy resources in the energy baskets of the members of the Association of Southeast Asian Nations ASEAN and the rest of the world to ensure energy sustainability As of 2020 most of the world s energy investment still went to carbon emitting sources namely fossil fuels On the other hand the Covid 19 pandemic and the economic Project Overview 20 March 2021 08 39 Page 6 of 9 downturns shrank the global energy demand including fossil fuels resulting in a sharp drop in their prices Low fossil fuel prices are harmful to developing renewable energy projects making solar wind and other renewable energy resources less competitive as sources of electricity This is endangering the Paris agreement and the Climate Action goal of the United Nations Given the high share of fossil fuels in the energy mix of the members of ASEAN tremendous challenges must be faced for their energy transition in the post Covid 19 world The

authors call for sound policy and applicable technologies to ensure sustainable energy availability accessibility and affordability to reach emission reduction targets

Climate Change and Developing Countries Nijavalli H.

Ravindranath, Jayant A. Sathaye, 2005-12-16 Among global environmental issues climate change has received the largest attention of national and global policy makers researchers industry multilateral banks and NGOs Climate change is one of the most important global environmental problems with unique characteristics It is global long term up to several centuries and involves complex interactions between climatic environmental economic political institutional and technological pressures It is of great significance to developing countries as all the available knowledge suggests that they and particularly their poorer inhabitants are highly vulnerable to climate impacts The projected warming of 1.4 to 5.8 °C by 2100 and the related changes in rainfall pattern rise in sea level and increased frequency of extreme events such as drought hurricanes and storms are likely to threaten food security increase fresh water scarcity lead to decline in biodiversity increase occurrence of vector borne diseases cause flooding of coastal settlements etc Recognizing the potential threat of severe disruptions the United Nations Conference on Environment and Development was organized in 1992 in Rio de Janeiro Brazil to begin to address ways to reduce these impacts which led to the formulation of the UN Framework Convention on Climate Change This Convention and the subsequent Kyoto Protocol recognize the common but differentiated responsibility of developing and industrialized countries in addressing climate change Developing countries thus have a unique role to play in formulating a sound reasoned and well informed response to the threat of climate change
