

High School Mathematics Lesson Plan: Algebra

Each lesson in the Adolescent Literacy Toolkit is designed to support students through the reading/learning process by providing instruction before, during, and after reading/learning.

Note that lessons incorporate the *gradual release of responsibility* model. When this model is used within a single lesson and over several lessons, students are provided with enough instruction and guidance to use the literacy strategies on their own. The following lesson includes some examples of explicit instruction and modeling, guided practice, and independent practice, but students need more practice and feedback than is possible within the context of a single lesson.

Instructional Outcomes

NCTM Standards: 10.1 Analyze patterns, relations, and functions of one and two variables.
1.4 Monitor and reflect on the process of mathematical problem solving.

Content Learning Outcome: Students will learn how to think about and connect mathematics text, examples, and exercises to determine when to use algebraic solutions to solve systems of equations.

Literacy Support Strategies and Instruction

Before reading/learning: Think-Aloud (teacher modeling)

- Materials: Sample of a real-life problem that demonstrates how elimination, addition, or subtraction can be used to solve a system of equations (see clothing sale example below)

During reading/learning: Think-Aloud (whole group guided practice)

- Materials: Text selection for using elimination, addition, or subtraction to solve a system of equations, and a prepared **Think-Aloud** on how to solve the system of equations (see sample below)

After reading/learning: Think-Aloud (individual/paired group practice)

- Materials: Text selection with explanation and examples of how to solve the system of equations by substitution, addition, or subtraction

Education and Climate Change Fernando M. Reimers, 2020-12-03 This open access volume draws on a multidimensional model of educational change the book reviews the field of climate change education and identifies some of the areas in which past efforts have fallen short in supporting effective pedagogical change at scale It then formulates an approach to engage university students and faculty in partnering with schools and adult education institutions and directly contribute innovative curricula on climate change The approach is illustrated with several case studies which present curricula developed to support school based innovation in the Middle East and in Guatemala and adult education in Haiti and Pakistan and educators preparation at the university level The approach followed to develop innovative curriculum follows five steps 1 What are the specific impacts of climate change in this jurisdiction How do they impact various human populations 2 What knowledge dispositions and behaviors could mitigate the impact of climate change and are there ways in which changes in the behaviors of populations in this jurisdiction could slow down climate change 3 What are the means of delivery to reach each of the specific populations in this jurisdiction who needs to be educated on climate change 4 What curriculum can help educate each population 5 What role can the institution we are collaborating with play in advancing climate change education in that jurisdiction The various chapters of the book present the conceptual foundation of these programs and illustrate how these programs respond to specific characteristics of local contexts These programs focus in schools non formal settings and educator preparation institutions The chapters offer examples of general value beyond the specific contexts for which they were designed as they illustrate how in order to be optimally useful climate change education needs to be firmly grounded in the specifics of a context and responsive to that context

Making Literacy Real Joanne Larson, Jackie Marsh, 2005-10-03 Joanne Larson and

Jackie Marsh's *Literacy Learning* is easily the most theoretically sophisticated and practically useful discussion of sociocultural and critical approaches to literacy learning that has appeared to date. James Paul Gee, Tashia Morgidge, Professor of Reading, University of Wisconsin-Madison, *Making Literacy Real* is the essential reference text for primary education students at undergraduate and graduate level who want to understand literacy theory and successfully apply it in the classroom. Doctoral students will find this a useful resource in understanding the relationship of theory to practice. The authors explore the breadth of this complex and important field, orientating literacy as a social practice grounded in social, cultural, historical, and political contexts of use. They also present a detailed and accessible discussion of the theory and its application in the primary classroom.
