Circular Economy 2025 Edition:

Handbook of Research on Designing Sustainable Supply Chains to Achieve a Circular Economy Ramakrishna, Yanamandra, Wahab, Siti Norida, 2023-04-17 Securing a sustainable supply chain is crucial for business and the future of humanity. Intending to lower waste and carbon emissions, businesses are investing more money in sustainability efforts. However, sustainability measures that might save costs, improve forecasting, and optimize business operations are frequently disregarded, especially during the post-pandemic era. The Handbook of Research on Designing Sustainable Supply Chains to Achieve a Circular Economy analyzes various approaches and strategies for developing sustainable supply chain capabilities to achieve circular economies, builds and develops models, frameworks, and theoretical concepts by focusing on the role of a sustainable supply chain leading to a circular economy, and provides a platform where new concepts and plans for managing sustainable supply chains in the post-pandemic era with the aid of Industry 4.0 as enablers are discussed. Covering key topics such as tourism, healthcare, transportation, and governance, this major reference work is ideal for industry professionals, government officials, business owners, managers, entrepreneurs, policymakers, scholars, researchers, academicians, instructors, and students.

Strategic Management and the Circular Economy Marcello Tonelli, Nicolò Cristoni, 2018-10-26 In recent years, the Circular Economy (CE) has gained worldwide attention as an effective alternative economic system to the current take-make-waste model of production and consumption. As more and more firms begin to recognize the potential of this novel approach, the CE quickly moves from theory to practice, and the demand for a coherent and structured strategic approach, one that companies can rely upon when commencing their circular journey, grows accordingly. Strategic Management and the Circular Economy aims to bridge the theory-practice gap by putting forward a detailed step-by-step process for analysis, formulation, and planning of CE strategies. Starting from a solid framework of easy-to-grasp constructs, key principles, business objectives, and areas of intervention, the authors guide the reader through an understanding of how conventional tools for strategic management can be reprogrammed under a CE perspective. To assist learning and encourage circular thinking, the reader is constantly prompted with examples of how forward-looking companies across industries and geographies are already applying circular strategies to future-proof their operations, boost innovation, penetrate new markets, and secure customer loyalty.

Cyclic Economy Michele Aresta, Angela Dibenedetto, Franck Dumeignil, 2024-10-07 The first volume of the series Carbon Cyclic Economy presents various policies of recycling carbon in some major countries, and the EU. Advances and best practices are discussed for using alternative carbon such as recycled plastics, waste biomass, and CO₂, each with its characteristic limits for applications in the chemical industry and aviation fuels.

Circular Economy, Industrial Ecology and Short Supply Chain Delphine Gallaud, Blandine Laperche, 2016-06-14 In contrast to the linear take make dispose model of resource consumption a new industrial model is proposed in the form of a circular economy This model aims to optimize the use of resources and to reduce or eliminate waste and is based on re use repair ecodesign industrial ecology sustainable supply and responsible consumption Industrial ecology and short supply chains can contribute particularly on a territorial scale to the emergence of a real sustainable development This book develops these concepts and presents experiments that are taking place in France and other countries in addition to an integrated model which details the mechanisms through which industrial ecology and short supply chains can generate economic social and environmental profits The possible issues and obstacles facing these new practices are also analyzed in order to develop the outline of an adapted management and governance which will enable them to be fully realized

Monitoring Progress towards a Resource-Efficient and Circular Economy OECD, 2024-06-26 Policies that foster the transition towards a more circular economy are gaining significant traction Such policies are essential for a sustainable low carbon resource efficient and competitive economy These developments bring about demands for reliable information to track progress and gauge results as well as for indicators that speak to policymakers and the public at large This report presents a conceptual framework and indicator set to monitor progress and inform circular economy policies It is designed to support OECD work on circular economy and provides a source of inspiration for countries seeking to build a coherent circular economy monitoring framework
