American Science Fiction And The Cold War Literature And Film:

American Science Fiction and the Cold War David Seed, 2013-10-31 American Science Fiction in both literature and film has played a key role in the portrayal of the fears inherent in the Cold War. The end of this era heralds the need for a reassessment of the literary output of the forty year period since 1945. Working through a series of key texts *American Science Fiction and the Cold War* investigates the political inflections put on American narratives in the post war decades by Cold War cultural circumstances. Nuclear holocaust, Russian invasion and the perceived rise of totalitarianism in American society are key elements in the author's exploration of science fiction narratives that include *Fahrenheit 451*, *Invasion of the Body Snatchers* and *Dr Strangelove*. *Monsters, Mushroom Clouds, and the Cold War* M. Keith Booker, 2001-05-30 The 1950s are widely regarded as the golden age of American science fiction. This book surveys a wide range of major science fiction novels and films from the long 1950s, the period from 1946 to 1964 when the tensions of the Cold War were at their peak. The American science fiction novels and films of this period clearly reflect Cold War anxieties and tensions through their focus on such themes as alien invasion and nuclear holocaust. In this sense they resemble the observations of social and cultural critics during the same period. Meanwhile American science fiction of the long 1950s also engages its historical and political contexts through an interrogation of phenomena such as alienation and routinization that can be seen as consequences of the development of American capitalism during this period. This economic trend is part of the rise of the global phenomenon that Marxist theorists have called late capitalism. Thus American science fiction during this period reflects the rise of late capitalism and participates in the beginnings of postmodernism described by Frederic Jameson as the cultural logic of late capitalism.

The Cold War in Science Fiction: Soviet and American Science Fiction Films in the 1950s Natalia Voinova, 2013-06-01 This study will compare the USSR and the United States according to their cinematic use of science fiction in the late 1950s and 1960s in order to coincide with the period of de-Stalinisation and thaw in the USSR and late McCarthyism in the United States. The genre provides an opportunity to express the two powers' scientific stand-off through fiction and serves as a vehicle for the dissemination of ideas and propaganda. Post 1956 marks the time when the period of de-Stalinisation officially began and science fiction saw a carefully crafted rebirth for it served as a tool that could reflect the socialist ideal and quasi-religious faith in science that was promoted by the party. Science fiction uniquely demands for an imaginative view of the future and therefore corresponds with the Marxist-Leninist future-oriented ideology. For this period the themes for American science fiction are hyperbolised monsters and invasion and reflect the fear of the otherness of the Soviet Union and its threat on domestic ideals. These themes are reflected in movies as *Angry Red Planet* and *Them*. On the other hand Soviet science fiction movies focus on the heroic Soviet man who frequently receives calls for help from outer space and overcomes great trials to save those not living in utopia. This storyline is represented in *Towards a Dream* and *The Sky is Calling*. The author gives special attention to the Soviet movie *The Sky is Calling* and the

subsequent redubbed American version *Battle Beyond the Sun* Further she addresses alterations or plot and subtle propaganda messages in the Soviet movies *Planet of Storms* and the Hollywood remake *Journey to the Prehistoric Planet*
