Brief Separations:

Brief Separations Christoph Mathew Heinicke, Ilse J. Westheimer, 1966 **The Psychobiology of Attachment and Separation** Martin Reite, 2012-12-02 The Psychobiology of Attachment and Separation provides an understanding of certain theoretical issues involved in social attachment and separation The book brings together a number of investigators studying animal and human models of the psychobiology of attachment and separation The contributors are actively conducting studies that incorporate physiological measures in attachment separation paradigms Thus the book's unique features include reviews and interpretations of recent data on the physiological correlates of attachment and separation behavior in both animals and humans The book is divided into two parts one on animal models and one on human models The first part reviews research from several animal species including studies on the biology of maternal behavior and physiological neurochemical and neuroanatomical correlates of both attachment and separation The chapters on animal models provide an overview of the state of knowledge on both the biology of social attachment and the biological correlates of separation The second part presents reviews and new data on attachment and separation in human infants A summary chapter examines both animal and human data and offers a synthesis of the results including clinical implications and ideas for future research

Stress and Coping in Infancy and Childhood Tiffany M. Field, Philip McCabe, Neil Schneiderman, 2013-02-01 The fourth volume based on the annual University of Miami symposia on stress and coping this new addition to the series is the first to focus on developmental and clinical stressors during infancy and childhood While developmental stressors such as early separation and stranger anxiety novelty stress and fear evoked personal distress arise during normal development clinical stressors result from certain conditions that are relatively common in infancy and early childhood such as premature birth and respiratory disease Various therapies are discussed for example relaxation and massage that can alleviate the stress associated with psychiatric conditions in childhood and adolescence including depression and adjustment disorder The result is an integration of diverse research and theory on the psychophysiological developmental and psychosocial aspects of stress and coping in animals and humans by some of the leading researchers in the field **Separation/individuation** Joyce

Edward, Nathene Ruskin, Patsy Turrini, 1992 First published in 1993 Routledge is an imprint of Taylor Francis an informa company *Taking Space* Robert J. com **Neurodevelopmental Mechanisms in Psychopathology** Dante Cicchetti, Elaine F. Walker, 2003-08-18 This volume represents a burgeoning perspective on the origins of psychopathology one that focuses on the development of the human central nervous system The contemporary neurodevelopmental perspective assumes that mental disorders result from etiologic factors that alter the normal course of brain development Defined here in its broadest sense neurodevelopment is a

process that begins at conception and extends throughout the life span We now know that it is a complex process and that its course can be altered by a host of factors ranging from inherited genetic liabilities to psychosocial stressors This book features the very best thinking in the converging fields of developmental neuroscience and developmental psychopathology The developmental window represented is broad extending from the prenatal period through adulthood and the authors cover a broad range of etiologic factors and a spectrum of clinical disorders Moreover the contributors did not hesitate to use the opportunity to hypothesize about underlying mechanisms and to speculate on research directions

The Development of Attachment and Affiliative Systems Robert Emde, 2013-04-18 The Development of Attachment and Affiliative Systems was selected as the topic for a three day workshop held at Estes Park Colorado in May 1980 The papers which resulted from this effort not only reflect a recent intensity of research in this area but also highlight a mounting need for asking questions across disciplines and for integrating theories The sponsor of the workshop was the Developmental Psychobiology Research Group DPRG of the Department of Psychiatry University of Colorado Medical School a group which itself is interdisciplinary and which has met regularly since 1969 to criticize research ask questions and discuss findings In 1974 the Group was awarded an endowment fund by the Grant Foundation after a request for a proposal initiated by Philip Sapir and Douglas Bond The aims of this fund are to facilitate the research of young investigators to encourage new research and to provide seed money for collaborative ventures Much of what is reported here results from that support Thus happily not only are the contributions timely by virtue of converging on an important topic but they also commemorate more than five years of Grant Foundation support Once the topic was chosen a small number of guests were invited to participate The papers of Timiras Sackett Konner and Lamb represent differing perspectives from neurobiology primatology cultural anthropology and social psychology

Handbook of Social and Evaluation Anxiety H. Leitenberg, 2013-11-11 For a long time I have wanted to put together a book about social and evaluation anxiety Social evaluation anxiety seemed to be a stressful part of so many people's everyday experience It also seemed to be a part of so many of the clinical problems that I worked with Common terms that fit under this rubric include fears of rejection humiliation criticism embarrassment ridicule failure and abandonment Examples of social and evaluation anxiety include shyness social inhibition social timidity public speaking anxiety feelings of self-consciousness and awkwardness in social

situations test anxiety performance anxiety in sports theater dance or music shame guilt separation anxiety social withdrawal procrastination and fear of job interviews or job evaluations of asking someone out of not making a good impression or of appearing stupid foolish or physically unattractive In its extreme form social anxiety is a behavior disorder in its own right social phobia This involves not only feelings of anxiety but also avoidance and withdrawal from social situations in which scrutiny and negative evaluation are anticipated Social evaluation anxiety also plays a role in other clinical disorders For example people with agoraphobia are afraid of having a panic attack in public in part because they fear making a spectacle of themselves Moreover even their dominant terrors of going crazy or having a heart attack seem to reflect a central concern with social abandonment and isolation *Attachment in Adulthood, First Edition* Mario Mikulincer, Phillip R. Shaver, 2010-01-04 The concluding chapter reflects on the key issues addressed considers the deeper philosophical implications of current work in the field and identifies pivotal directions for future investigation BOOK JACKET
