Bringing Women Into Management Francine E. Gordon, Myra H. Strober, 1975 Women in Management JoAnne Yarborough, United States. Department of Labor. Library, 1978 *Women in Management* Sanghamitra Buddhapriya, 1999 Based on a survey of 160 women managers from ten public sector organizations carried out between 1993 and 1996 Investigates factors affecting their career development focusing on five main variables the sex role orientation of these managers leadership style fear of success organizational stresses and coping style Includes a review of the literature on these issues and looks at the status of women managers in some other countries Women in Asian Management Vimolwan Yukongdi, John Benson, 2013-10-18 According to a recent study by the ILO 2001 women's share of the labour force is increasing worldwide Today women's participation rate in the labour force is over 40 per cent of the global workforce Higher educational levels and falling fertility rates have contributed to this increased participation There is also some evidence that women in some Asian countries may be less marginalised in their advancement into top managerial positions than their counterparts elsewhere As women become more educated and qualified for managerial positions the number of Asian women managers and executives is predicted to rise over the next decade This book examines the opportunities and barriers for women managers in Asia and presents an update on their progress in management This book was previously published as a special issue of the Asian Pacific Business Review *Women in Management Worldwide* Ronald J. Burke, Astrid M. Richardsen, 2016-08-12 Organizations today are facing unprecedented challenges including an ageing workforce potential talent shortages an increasingly competitive international environment and the need to utilize the talents of the best qualified people regardless of gender More women than men in many cases are graduating from universities and gaining the requisite experience to qualify for advancement to higher levels of management In this expanded and revised third edition Professors Burke and Richardsen together with a list of international contributors address women's progression in the workforce and into the upper echelons of management They cover a range of professions and a geographically dispersed territory thereby advancing the understanding of women in management within a traditional context and making a substantial contribution to the literature for both an academic and practitioner audience The broader regional perspective offers a comprehensive overview of the challenges and opportunities facing women in the workplace and promotes the ongoing analysis of the interface between women's career aspirations and societal and organizational norms assumptions and values Following the same format as the previous edition the country by country analysis allows for the data between countries and regions to be compared for the differences to be addressed and a more holistic picture of the situation in a given country to be assessed *Women in Management Worldwide* will appeal to researchers policy makers in a range of countries interested in workforce issues talent management and gender equality as well as consultants working with international organizations on HRM and organizational effectiveness challenges Pull Pamela Walker LAIRD, 2009-06-30 Redefining the way we view business

success Pamela Laird demolishes the popular American self made story as she exposes the social dynamics that navigate some people toward opportunity and steer others away Who gets invited into the networks of business opportunity What does an unacceptable candidate lack The answer is social capital all those social assets that attract respect generate confidence evoke affection and invite loyalty In retelling success stories from Benjamin Franklin to Andrew Carnegie to Bill Gates Laird goes beyond personality upbringing and social skills to reveal the critical common key access to circles that control and distribute opportunity and information She explains how civil rights activism and feminism in the 1960s and 1970s helped demonstrate that personnel practices violated principles of equal opportunity She evaluates what social privilege actually contributes to business success and analyzes the balance between individual characteristics effort innovation talent and social factors such as race gender class and connections In contrasting how Americans have prospered or not with how we have talked about prospering Laird offers rich insights into how business really operates and where its workings fit within American culture From new perspectives on entrepreneurial achievement to the role of affirmative action and the operation of modern corporate personnel systems Pull shows that business is a profoundly social process and that no one can succeed alone

American Women of Science since 1900 Tiffany K. Wayne, 2010-10-11 A comprehensive examination of American women scientists across the sciences throughout the 20th century providing a rich historical context for understanding their achievements and the way they changed the practice of science Much more than a Who's Who this exhaustive two volume encyclopedia examines the significant achievements of 20th century American women across the sciences in light of the historical and cultural factors that affected their education employment and research opportunities With coverage that includes a number of scientists working today the encyclopedia shows just how much the sciences have evolved as a professional option for women from the dawn of the 20th century to the present American Women of Science since 1900 focuses on 500 of the 20th century's most notable American women scientists many overlooked undervalued or simply not well known In addition it offers individual features on 50 different scientific disciplines Women in Astronomy etc as well as essays on balancing career and family girls and science education and other sociocultural topics Readers will encounter some extraordinary scientific minds at work getting a sense of the obstacles they faced as the scientific community faced the questions of feminism and gender confronting the nation as a whole
