escape desire to return and repossess etc which writers have brought to correspond to a wide range of contrapuntal discourses It has been envisioned as the exclusive space for the artist the woman as time s backwater as the magic realm of the surreal hyperreal fantasia etc Island has come to semiotize a wide range of tropes and significations It appears that if island is a signifier then the signified are endless Indeed the island paradigm seems to be like a magic crystal reflecting innumerable strands and shades of meanings depending on the way you looked at it The subject involves an area of oceanic vastness starting from the coast of the ancient ages right into the ports of the modern and postmodern times The area has been ever spreading and vibrant texts have been sprawling all the time sprouting newer branches accumulating newer layers of meaning and striking newer depths of perception and insight This book an outcome of the UGC Emeritus Fellowship has been an attempt to scoop up a few of these infinite infinities of islands as they are presented and projected in texts across ages and spaces starting from Valmiki and Homer and continuing into the postmodern islands of Jose Saramago and Umberto Eco
