J Paul Hodgson

British Flying Boats:

British Flying Boats Peter London, 2003 A history of the flying boat a unique form of aircraft with the ability to operate from sea or river and in amphibian form from land too Over 100 types of British flying boat and amphibian were built during a 40 year period from the days of the pioneer airmen to the advent of the jet engine **British Flying-boats and Amphibians, 1909-1952** Godfrey Richard Duval, 1966 Adventurous Empires Phillip E. Sims, 2020-01-24 A milestone in twentieth century aviation is brought to life in this chronicle of the Short Empire the plane that transformed British global transportation In 1937 the Short Brothers aerospace company introduced the most successful flying boat airliner ever built Designed to a specification for Imperial Airways then Britain's national airline the Short Empire flying boat carried passengers and more importantly mail throughout the British Empire The airliner offered luxurious travel for the privileged few every journey being an adventure shared by passengers and crew Short Brothers built forty two Empires at their factory in Rochester during the late 1930s This fleet enabled Imperial Airways to expand their network to the furthestmost outposts of the British Empire whilst laying down the principles of scheduled airline operation During World War II the Short Empire was adapted for military use as the iconic Sunderland Adventurous Empires chronicles how this innovative craft was developed and deployed turning an aviation dream into reality **Flying Boats** Alex Frame, 2007 Flying Boats My Father's War in the Mediterranean is an exciting and original blend of personal memoir and war history Alex Frame's father was a flying boat pilot in war and afterwards in peace and the roots of this book are the logbooks he kept over his 30 year career the first covering early flights in 1938 and the war years the second from 1950 to 1960 flying in Sydney and then Tahiti on the legendary Coral route around the Pacific Islands and the third the final years flying in the Pacific from 1960 to 1969 This book concentrates on the years of World War II and the star of the story is the Sunderland flying boat T9046 while under the command of Alex's father from November 1940 to June 1941 During this concentrated period of setbacks and disasters for the Commonwealth and British forces the crews of the large graceful flying boats were both saviours and victims in the struggle against Hitler's war machine Back cover Fabulous Flying Boats Leslie Dawson, 2013-07-16 The history of the development and operations of flying boats in the early twentieth century is a vibrant one full of colourful characters and experimentation In Fabulous Flying Boats Leslie Dawson captures this spirit of dynamism reminding us of the most successful early pioneers of the seaplanes development including a little known and oft overlooked rival to the Wright Brothers working to put their mutual successes in context He goes on to describe in clear and vivid detail and using first hand accounts what it was like to be aboard one of the resulting huge passenger flying boats as air crew and as a passenger He also recounts the part played by the military boats inevitably seconded to such use Incredibly well researched the narrative embraces the globe trotting air routes from Europe to the Far East and to the Americas and is well supported with evocative images from private and corporate collections and the world's aviation museums The in depth Appendix is virtually

a book in itself This book is sure to be a welcome addition to any Aviation enthusiasts library as it covers a particularly important period of Aviation development which formed a fertile environment for a host of young experimenters The process of development continues to this day

Flying Boats & Seaplanes Stéphane Nicolaou,1998 Beginning with races that were staged at elegant French resorts in the early part of the century flying boats and seaplanes have played an integral part in aviation history World War I spurred the development of these machines and by the 1930s flying boats and seaplanes had become pioneers in transcontinental flight This photo filled history recalls the role of flying boats and seaplanes in civil and military aviation history and the enthusiasm of the engineers and pilots who are associated with their development In addition to the golden years of hydraviation prior to World War II author Nicolaou examines the decline of the seaplane and its subsequent renaissance in nations that are today considered seaplane paradises The saga is illustrated by more than 200 rare photographs uncovered in archives around the globe

British Aircraft Manufacturers Since 1909 Peter G. Dancey,2017-01-24 British Aircraft Manufacturers since 1909 traces one hundred years of the British aviation industry its history origins mergers and takeovers It details the evolution of the British aviation industry and is an epitaph to household famous names such as Armstrong Whitworth de Havilland Chadwick Claude Graham White Sopwith A V Roe Mitchell Hawker Handley Page Petter and Fairey to name but a few Of more recent times the likes of Sidney Camm Hooker and Hooper all of whom made VTOL more than just a dream are also covered in astonishing and exhausting detail Of the major firms most at some time or other have been absorbed merged or reorganised to form a single conglomerate BAe Systems and Rolls Royce are chronicled from the outset to the mighty companies they are today Only PBN Britten Norman who on several occasions escaped extinction due to financial difficulties and Westland now part of AgustaWestland and Short Bros of Northern Ireland remain independent although even the latter are part of Canadian Bombardier Co British Aircraft Manufacturers since 1909 tells the complete and enthralling story of how Britain ruled the world in terms of manufacturing and aircraft design from nimble but fragile biplanes and majestic airliners that united the world to the advanced bombers and fighters of today

Jet Flying Boats David Oliver,2018-03-15 In this book aviation historian David Oliver covers the little known flying boat legacy of the Second World War

Flying Boats Charles Woodley,2018-08-10 Flying Boats Air Travel in the Golden Age sets out to do justice to a time of glamorous unhurried air travel unrecognisable to most of today s air travellers but sorely missed by some During the 1930s long distance air travel was the preserve of the flying boat which transported well heeled passengers in ocean liner style and comfort across the oceans But then the Second World War came and things changed Suddenly landplanes were more efficient and in abundance long concrete runways had been constructed during the war that could be used by a new generation of large transport aircraft and endless developments in aircraft meant they could fly faster and for further distances Commercial flying boat services resumed but their days would be numbered

Britain's Glorious Aircraft Industry J Paul Hodgson,2021-03-03 The rich and diverse history of the British aircraft industry is captured in superb detail

by the author in this weighty tome Aviation News Great Britain's aircraft industry started in 1908 with the first formally registered organization in the world to offer to design and build an aeroplane for commercial gain This book tells the complete story of the 110 years since the start all the companies formed and the aircraft they produced highlighting the advances in aeronautical ambition and technology It is the story of the creation survival and decline of all one hundred and twenty three of the aircraft design and construction companies formed between 1908 and 2018 The exhilaration of success and the magic of aviation technology are vividly illustrated by the technical and political birth stories of iconic projects such as the Cirrus Gypsy Moths the Tiger Moth the flying boats of Imperial Airways Spitfire Lancaster Viscount Vulcan Harrier Buccaneer and many more The rotary wing industry is not forgotten The birth of the jet turbine engine and the quest for supersonic speed is included The stories of the disappointments of failure and disaster such as the Brabazon Comet Princess Rotodyne and TSR 2 and the growth of international collaboration in Concorde Tornado Airbus Eurofighter Typhoon and other projects are included in the context of the international scene and domestic politics The conclusion highlights the prominent reminiscences and speculates on the future of the aircraft industry in Britain An outstanding reference book and a thoroughly enjoyable canter through the decades from the days of wood and fabric to the modern composite structure of the wings of the A400 Atlas RAF Historical Society
