Swain, 2010-04-09 Nearly all religious traditions have reserved a special place for sacred music Whether it is music accompanying a ritual or purely for devotional purposes music composed for entire congregations or for

the trained soloist or music set to holy words or purely instrumental in some form or another music is present In fact in some traditions the relation between the music and the ritual is so intimate that to distinguish between them would be inaccurate The A to Z of Sacred Music covers the most important aspects of the sacred music of Buddhism Christianity Confucianism Hinduism Islam Judaism and other smaller religious groups It provides useful information on all the significant traditions of this music through the use of a chronology an introductory essay a bibliography appendixes and hundreds of cross referenced dictionary entries on major types of music composers key religious figures specialized positions genres of composition technical terms instruments fundamental documents and sources significant places and important musical compositions *Historical Dictionary of Sacred Music* Joseph P. Swain, 2016-10-11 Sacred music is a universal phenomenon of humanity Where there is faith there is music to express it Every major religious tradition and most minor ones have music and have it in abundance and variety There is music to accompany ritual and music purely for devotion music for large congregations and music for trained soloists music that sets holy words and music without words at all In some traditions Islamic and many Native American to name just two the relation between music and religious ritual is so intimate that it is inaccurate to speak of the music accompanying the ritual Rather to perform the ritual is to sing and to sing the ritual is to perform it This second edition of *Historical Dictionary of Sacred Music* contains a chronology an introduction appendixes and an extensive bibliography The dictionary section has over 800 cross referenced entries on major types of music composers key religious figures specialized positions genres of composition technical terms instruments fundamental documents and sources significant places and important musical compositions This book is an excellent access point for students researchers and anyone wanting to know more about sacred music *Sourcebook for Research in Music, Third Edition* Allen Scott, 2015-06-01 Since it was first published in 1993 the *Sourcebook for Research in Music* has become an invaluable resource in musical scholarship The balance between depth of content and brevity of format makes it ideal for use as a textbook for students a reference work for faculty and professional musicians and as an aid for librarians The introductory chapter includes a comprehensive list of bibliographical terms with definitions bibliographic terms in German French and Italian and the plan of the Library of Congress and the Dewey Decimal music classification systems Integrating helpful commentary to instruct the reader on the scope and usefulness of specific items this updated and expanded edition accounts for the rapid growth in new editions of standard works in fields such as ethnomusicology performance practice women in music popular music education business and music technology These enhancements to its already extensive bibliographies ensures that the *Sourcebook* will continue to be an indispensable reference for years to come **British Women Composers and Instrumental Chamber Music in the Early Twentieth Century** Laura Seddon, 2016-04-15 This is the first full length study of British women s instrumental chamber music in the early twentieth century Laura Seddon argues that the Cobbett competitions instigated by Walter Willson Cobbett in 1905 and the formation of the Society of Women

Musicians in 1911 contributed to the explosion of instrumental music written by women in this period and highlighted women's place in British musical society in the years leading up to and during the First World War. Seddon investigates the relationship between Cobbett, the Society of Women Musicians and women composers themselves. The book's six case studies of Adela Maddison (1866-1929), Ethel Smyth (1858-1944), Morfydd Owen (1891-1918), Ethel Barns (1880-1948), Alice Verne Bredt (1868-1958) and Susan Spain Dunk (1880-1962) offer valuable insight into the women's musical education and compositional careers. Seddon's discussion of their chamber works for differing instrumental combinations includes an exploration of formal procedures, an issue much discussed by contemporary sources. The individual composers' reactions to the debate instigated by the Society of Women Musicians on the future of women's music is considered in relation to their lives, careers and the chamber music itself. As the composers in this study were not a cohesive group creatively or ideologically, the book draws on primary sources as well as the writings of contemporary commentators to assess the legacy of the chamber works produced.

**English Cathedral Music and Liturgy in the Twentieth Century** Martin Thomas, 2016-03-09. This book examines the stylistic development of English cathedral music during a period of liturgical upheaval, looking at the attitudes of cathedral clergy, liturgists, composers, leading church music figures and organisations to music and liturgy. Arguments that were advanced for retaining an archaic style in cathedral music are considered, including the linking of musical style with liturgical language, the recommending of a subservient role for music in the liturgy and the development of a language of fittingness to describe church music. The roles of the RSCM and other influential bodies are explored. Martin Thomas draws on many sources: the libraries and archives of English cathedrals, contemporary press coverage and the records of church music bodies, publishing practices, secondary literature and the music itself. Concluding that an arresting of development in English cathedral music has prevented appropriate influences from secular music being felt, Thomas contrasts this with how cathedrals have often successfully and dynamically engaged with the world of the visual arts, particularly in painting and sculpture. Presenting implications for all denominations and for patronage of the arts by churches and the place of musical aesthetics in the planning of liturgy, this book offers an important resource for music theology, liturgy students and ministry teams worldwide.

The Music of Herbert Howells Phillip A. Cooke, David Nicholas Maw, 2013. The first large scale study of the music of Herbert Howells, prodigiously gifted musician and favourite student of the notoriously hard to please Sir Charles Villiers Stanford. Herbert Howells (1892-1983) was a prodigiously gifted musician and the favourite student of the notoriously hard to please Sir Charles Villiers Stanford. Throughout his long life he was one of the country's most prominent composers, writing extensively in all genres except the symphony and opera. Yet today he is known mostly for his church music and there is as yet relatively little serious study of his work. This book is the first large scale study of Howells's music, affording both detailed consideration of individual works and a broad survey of general characteristics and issues. Its coverage is wide ranging, addressing all aspects of the composer's prolific output and probing many of the issues that it raises. The essays are

gathered in five sections Howells the Stylist examines one of the most striking aspect of the composer s music its strongly characterised personal voice Howells the VocalComposer addresses both his well known contribution to church music and his less familiar but also important contribution to the genre of solo song Howells the Instrumental Composer shows that he was no less accomplished for his work in genres without words for which in fact he first made his name Howells the Modern considers the composer s rather overlooked contribution to the development of a modern voice for British music and Howells in Mourning explores the important impact of his son s death on his life and work The composer that emerges from these studies is a complex figure technically fluent but prone to revision and self doubt innovative but also conservative a composer with an improvisational sense of flow who had a firm grasp of musical form an exponent of British musical style who owed as much to continental influence as to his national heritage This volume comprising a collection of outstanding essays by established writers and emergent scholars opens up the range of Howells s achievement to a wider audience both professional and amateur PHILLIP COOKE is Lecturer in Composition at theUniversity of Aberdeen DAVID MAW is Tutor and Research Fellow in Music at Oriel College Oxford holding Lectureships also at Christ Church The Queen s and Trinity Colleges CONTRIBUTORS Byron Adams Paul Andrews Graham Barber Jonathan Clinch Phillip A Cooke Jeremy Dibble Lewis Foreman Fabian Huss David Maw Diane Nolan Cooke Lionel Pike Paul Spicer Jonathan White Foreword by John Rutter

Music Library and Research Skills Jane Gottlieb,2017 Concise and engaging this text covers a wide range of reference sources for research in all genres of music Through this practical introduction to the key concepts of music research students will develop a firm understanding of the tools used to gather data including what types of sources exist how they are arranged and how they may best be used to do research
