British Steel An Industry Between The State And Private Sector:

British Steel Heidrun Abromeit, 1986 **Reappraising State-Owned Enterprise** Franco Amatori, Robert Millward, Pier Angelo Toninelli, 2013-06-17 After a quarter century of almost general condemnation and rebuttal of the entire nationalization experience it appears that there are second thoughts about governmental direct intervention in the economy Reappraising State Owned Enterprise deals with a topic often undervalued in the past decade but which now with the crisis of 2008 2009 calls for greater attention the direct intervention of the State as Entrepreneur The collection of essays in this volume prepared by some of the leading authorities in the field offers a contribution to this debate by providing a balanced assessment of two of the most relevant experiences of mixed economies the United Kingdom and Italy In this respect a comparison between these two countries is very much appropriate since in both nations the State played an important role as Entrepreneur starting in the early 20th century In Great Britain and Italy the heyday of the State as Entrepreneur was in the years right after WWII when it was used as a tool for promoting a modern society in which citizens acquired a stronger sense of belonging to their nations The UK and Italy saw the State take on a too pervasive role in the 70s the two nations responded in different ways In the 1980s Great Britain embarked on a harsh process of privatizations while Italians struggled on until finally submitting to privatizations in their nation in the following decade The deep crisis of the final years of the 21st century forced both nations to reconsider State interventions as an appropriate tool in order to protect the wellbeing of the national economy **The European Yearbook of Business History** Wilfried Feldenkirchen, Terry Gourvish, 2019-04-26 First published in 1999 this volume aims to reflect on the changing structure experience and aspirations of European business as it approaches the Millennium including chapters in issues including business scandals in the Weimar Republic the evolution of management consultancies in Portugal and Spain and the British Public Sector The yearbook exploits these changes by serving as a forum for debate in Europe and aims to bring work on individual countries to a wider European audience Responding to the challenge of globalization cooperation within a single European market and an increasing interest in corporate governance and environmental issues the yearbook broadens to include socio political issues along with stimulating new types of scholarship among European business historians and new preservation strategies by business archivists **International Bibliography of Business History** Francis Goodall, Terry Gourvish, Steven Tolliday, 2013-12-16 The field of business history has changed and grown dramatically over the last few years There is less interest in the traditional company centred approach and more concern about the wider business context With the growth of multi national corporations in the 1980s international and inter firm comparisons have gained in importance In addition there has been a move towards improving links with mainstream economic financial and social history through techniques and outlook The International Bibliography of Business History brings all of the strands together and provides the user with a comprehensive guide to the literature in the field The Bibliography is a unique volume which covers the depth and breadth of research in

business history This exhaustive volume has been compiled by a team of subject specialists from around the world under the editorship of three prestigious business historians **New Perspectives on Welsh Industrial History** Louise Miskell,2019-12-15 This volume tells a story of Welsh industrial history different from the one traditionally dominated by the coal and iron communities of Victorian and Edwardian Wales Extending the chronological scope from the early eighteenth to the late twentieth century and encompassing a wider range of industries the contributors combine studies of the internal organisation of workplace and production with outward facing perspectives of Welsh industry in the context of the global economy The volume offers important new insights into the companies the employers the markets and the money behind some of the key sectors of the Welsh economy from coal to copper and from steel to manufacturing and challenges us to reconsider what we think of as constituting industry in Wales British Steel Heidrun Abromeit,1986 **Hearings, Reports and Prints of the Senate Committee on the Judiciary** United States.
