Observatories 1772-1939 Roger Hutchins,2017-03-02 British University Observatories fills a gap in the historiography of British astronomy by offering the histories of observatories identified as a group by their shared characteristics The first full histories of the Oxford and Cambridge observatories are here central to an explanatory history of each of the six that undertook research before World War II Oxford Dunsink Cambridge Durham Glasgow and London Each struggled to evolve in the middle ground between the royal observatories and those of the Grand Amateurs in the nineteenth century Fundamental issues are how and why astronomy came into the universities how research was reconciled with teaching lack of endowment and response to the challenge of astrophysics One organizing theme is the central importance of the individual professor directors in determining the fortunes of these observatories the community of assistants and their role in institutional politics sometimes of the murkiest kind patronage networks and discipline shaping coteries The use of many primary sources illustrates personal motivations and experience This book will intrigue anyone interested in the history of astronomy of telescopes of scientific institutions and of the history of universities The history of each individual observatory can easily be followed from foundation to 1939 or compared to experience elsewhere across the period Astronomy is competitive and international and the British experience is contextualised by comparison for the first time to those in Germany France Italy and the USA The Inter-mountain Educator ,1919 **Reports from Universities and University**

involvement of the universities and industry has been one of the chief beneficial forces shaping the British universities movement in the last hundred years It gives an account of the changes which took place within the universities to make them more suitable for industries purposes describing for example the early rise of the English civic universities strongly financed by and closely supporting industry The book also considers how during the two world wars industry became highly reliant on the universities for the war technology and how despite the depression between the wars university research and graduate employment embraced the widening opportunities of the new industries The book also discusses the expansion of the university in the sixties and points out that industrial motives have merged with those of social justice posing dilemmas for present and future relations between universities and industry *African Series* United States.
