The ^AOxford Encyclopedia of Economic History Joel Mokyr, 2003-10-16 What were the economic roots of modern industrialism Were labor unions ever effective in raising workers living standards Did high levels of taxation in the past normally lead to economic decline These and similar questions profoundly inform a wide range of intertwined social issues whose complexity scope and depth become fully evident in the Encyclopedia Due to the interdisciplinary nature of the field the Encyclopedia is divided not only by chronological and geographic boundaries but also by related subfields such as agricultural history demographic history business history and the histories of technology migration and transportation The articles all written and signed by international contributors include scholars from Europe Latin America Africa and Asia Covering economic history in all areas of the world and segments of economies from prehistoric times to the present The Oxford Encyclopedia of Economic History is the ideal resource for students economists and general readers offering a unique glimpse into this integral part of world history

Rebuilding Britain's Blitzed Cities Catherine Flinn, 2018-12-27 Many British cities were devastated by bombing during the Second World War and faced stark economic dilemmas concerning reconstruction planning and implementation after 1945 How did politicians civil servants and local authorities manage to produce the cities we live in today Rebuilding Britain's Blitzed Cities examines the underlying processes and pressures especially financial and bureaucratic which shaped postwar urbanism in Britain Catherine Flinn integrates architectural planning with in depth economic and political analyses of Britain's blitzed cities for the first time She examines early reconstruction arrangements the postwar economic apparatus and the challenges of postwar physical planning across the country while providing insightful case studies from the cities of Hull Exeter and Liverpool By addressing the ideology versus the reality of reconstruction in postwar Britain Rebuilding Britain's Blitzed Cities highlights the

importance of economic and political factors for understanding the British postwar built environment **British**

Housebuilders Fred Wellings, 2008-04-15 *British Housebuilders* is the first comprehensive account of the corporate history of the twentieth century speculative housebuilding industry the firms that supplied those houses and the entrepreneurs who created those firms The transition from the local housebuilders of the 1930s through the regional diversification of the 1960s to the national housebuilders of today is charted via a series of industry league tables The rationale for the growth in national firms is analysed The conventional explanation of economies of scale is rejected instead the stock market is found to play a key role both in facilitating acquisitions and in demanding growth from its constituent companies The supply side analysis also addresses the frequent corporate failures succession issues lack of focus and the 1974 and 1990 recessions have played their part in equal measure *British Housebuilders* provides the first opportunity to review the evidence drawn from a century of speculative housebuilding it is only with this historical perspective that sound judgements can be made on the corporate role in housebuilding **History of Technology Volume 25** Ian Inkster, 2016-09-30 The technical problems confronting

different societies and periods and the measures taken to solve them form the concern of this annual collection of essays It deals with the history of technical discovery and change and explores the relationship of technology to other aspects of life social cultural and economic showing how technological development has shaped and been shaped by the society in which it occurred **Brick Bonds: A Life in Britain's Building Trade, 1902-1987** Roger Hansford, 2019-07-16 Despite recent

academic interest in oral history and working class writing few other autobiographies reveal daily life for early twentieth century itinerant gasworks bricklayers or retort setters Charles Hansford recounts constructing his own home single handedly aged twenty one describes economic privations and poor weather conditions *Brick Bonds* documents his relationships with fellow workers and specific building techniques they used a bond is a brick laying pattern His personal memories of enemy action in wartime working class social and leisure pursuits in London the 1924 National Building Strike and notable ships like *Titanic* and *Bismarck* are set into historical context Hansford reveals an evolving class awareness and trade union activism a declared Socialist he readily left building sites in protest even into the 1970s His career encompassed Fawley Refinery Royal Netley War Hospital British Overseas Airways Company flying boat bases and Harrods store in London

British queer history Brian Lewis, 2015-11-01 This collection of essays takes stock of the new British queer history It is intended both for scholars and students of British social and cultural history and of the history of sexuality and for a broader readership interested in queer issues In offering a snapshot of the field this volume demonstrates the richness and promise of one of the most vibrant areas of modern British history and the complexity and breadth of discussion debate and approach It showcases challenging think pieces from leading luminaries alongside some of the most original and exciting research by established and emerging young scholars The book provides a plethora of fresh perspectives and a wealth of new information suggests enticing avenues for research and in bringing the whole question of sexual identity to the forefront of debate

challenges us to rethink queer history's parameters *Transport and the industrial city* Peter Maw, 2018-02-28 This book presents the first scholarly study of the contribution of canals to Britain's industrial revolution. Although the achievements of canal engineers remain central to popular understandings of industrialisation, historians have been surprisingly reticent to analyse the full scope of the connections between canals, transport and the first industrial revolution. Focusing on Manchester, Britain's major centre of both industrial and transport innovation, it shows that canals were at the heart of the self-styled Cottonopolis. Not only did canals move the key commodities of Manchester's industrial revolution—coal, corn and cotton—but canal banks also provided the key sites for the factories that made Manchester the shock city of the early Victorian age. This book will become essential reading for historians and students interested in the industrial revolution, transport and the unique history of Manchester, the world's first industrial city.
