Britons View America Travel Commentary 1860 1935:

Britons View America: Travel Commentary, 1860-1935 Richard L. Rapson, 1971-01-01 Britons View America: Travel Commentary, 1860-1935 [By] Richard L. Rapson Richard L. Rapson, 1971 British Comment on the United States Ada B. Nisbet, 2001-06-07 This bibliography of more than three thousand entries often extensively annotated lists books and pamphlets that illuminate evolving British views on the United States during a period of great change on both sides of the Atlantic Subjects addressed in various decades include slavery and abolitionism women s rights the Civil War organized labor economic cultural and social behavior political and religious movements and the American character in general

Adolescence and Work David Stern, Dorothy Eichorn, 2013-06-17 This volume illustrates connections between the concerns of vocational psychology and the adjoining disciplines of sociology cultural anthropology and labor economics The intent is to suggest how vocational psychology and career counseling might recognize more explicitly the ever changing social influences and institutional constraints that affect individual as they begin or contemplate beginning their adult work

Home on the Rails Amy G. Richter, 2006-03-13 Recognizing the railroad s importance as both symbol and experience in Victorian America Amy G Richter follows women travelers onto trains and considers the consequences of their presence there For a time Richter argues nineteenth century Americans imagined the public realm as a chaotic and dangerous place full of potential where various groups came together collided and influenced one another for better or worse The example of the American railroad reveals how by the beginning of the twentieth century this image was replaced by one of a domesticated public realm a public space in which both women and men increasingly strove to make themselves at home Through efforts that ranged from the homey touches of railroad car decor to advertising images celebrating female travelers and legal cases sanctioning gender segregated spaces travelers and railroad companies transformed the railroad from a place of risk and almost unlimited social mixing into one in which white men and women alleviated the stress of unpleasant social contact Making themselves at home aboard the trains white men and women domesticated the railroad for themselves and paved the way for a racially segregated and class stratified public space that freed women from the home yet still preserved the railroad as a masculine domain Family and Divorce in California, 1850-1890 Robert L. Griswold, 1983-06-30 Family and Divorce in California succeeds in reconstructing the private world of farmers laborers small town merchants tradesmen and housewives through an examination of local newspapers census data legal documents and above all divorce records during the years 1850 to 1890 Some 400 divorce cases from two rural counties form the core of the study Here we see how the compassionate ideal the cult of true womanhood and the work ethic actually affected the attitudes and behavior of working class and rural as well as urban middle class people A wide variety of topics is covered basic family values women s health work sexuality character and independence men s work sexual conduct and affective relations the nature of parenthood childhood and marital companionship domestic violence The book also explores the early years of the divorce crisis that began

in the 1880s and answers the questions of how and why it developed Nineteenth-Century Travels, Explorations and Empires, Part I Vol 2 Peter J Kitson, William Baker, Indira Ghose, Susan Schoenbauer Thurin, 2021-12-16 A collection of writings on travels undertaken in the Victorian era The texts collected in these volumes show how 19th century travel literature served the interests of empire by promoting British political and economic values that translated into manufacturing goods *White Collar Fictions* Christopher P. Wilson, 2010-08-01 In *White Collar Fictions* Christopher P Wilson explores how turn of the century literary representations of white collar Americans the middle social strata H L Mencken dismissed as boobus Americanus were actually part and parcel of a new social class coming to terms with its own power authority and contradictions An innovative study that integrates literary analysis with social history research the book reexamines the life and work of Sherwood Anderson and Sinclair Lewis as well as such nearly forgotten authors as O Henry Edna Ferber Robert Grant and Elmer Rice Between 1885 and 1925 America underwent fundamental social changes The family business faded with the rise of the modern corporation mid level clerical work grew rapidly the white collar ranks sales clerks accountants lawyers advertisers middle managers and professionals expanded between capital and labor During this same period Wilson shows white collar characters took on greater prominence within American literature and popular culture Magazines like the Saturday Evening Post idolized average Americans while writers such as Sherwood Anderson and Sinclair Lewis produced portraits of middle America in Winesburg Ohio and Babbitt By investigating the material experience and social vocabularies within white collar life itself Wilson uncovers the ways in which writers helped create a new cultural vocabulary Babbitt the little people the Average American That served to redefine power authority and commonality in American society Manifest Destinations J. Philip Gruen, 2014-09-02 Tourists started visiting the American West in sizable numbers after the Union Pacific and Central Pacific Railroads were completed in 1869 Contemporary travel brochures and guidebooks of the 1870s sold tourists on the spectacular scenery of the West and depicted its cities as extensions of the natural landscape as well as places where efficient business operations and architectural grandeur prevailed all now easily accessible thanks to the relative comfort of transcontinental rail travel Yet as people flocked to western cities it was the everyday life that captured their interest the new technologies incessant clatter and all the upheaval of modern metropolises In *Manifest Destinations* J Philip Gruen examines the ways in which tourists experienced Chicago Denver Salt Lake City and San Francisco between 1869 and 1893 a period of rapid urbanization and accelerated modernity Gruen pays particular attention to the contrast between the way these cities were promoted and the way visitors actually experienced them Guidebooks made Chicago Denver Salt Lake City and San Francisco seem like picturesque environments sprinkled with civilized buildings and refined people But Gruen s research in diaries letters and traveler narratives shows that tourists were interested as tourists usually are in the unexpected encounters that characterize city life Visitors relished the cities unfamiliar storefronts and advertising public transit systems ethnic diversity and multiple dwellings in all their urban

messiness They thrust themselves into the noise danger and cacophony Western cities did not always live up to the marketing strategies of guidebooks but the western cities fast pace and many novelties held extraordinary appeal to visitors from the East Coast and abroad In recounting lively anecdotes and by focusing on tourist perceptions of everyday life in western cities Gruen shows how these cities developed the economy of tourism to eventually encompass both the urban and the natural West

Hanging Together John Higham, 2001-01-01 This book presents three decades of writings by one of America's most distinguished historians John Higham renowned for his influential works on immigration ethnicity political symbolism and the writing of history here traces the changing contours of American culture since its beginnings focusing on the ways that an extraordinarily mobile society has allowed divergent ethnic class and ideological groups to hang together as Americans The book includes classic essays by Higham and more recent writings some of which have been substantially revised for this publication Topics range widely from the evolution of American national symbols and the fate of our national character to new perspectives on the New Deal on other major turning points and on changes in race relations after major American wars Yet they are unified by an underlying theme that a heterogeneous society and an inclusive national culture need each other
