Britain Poland And The Eastern Front 1939:

Britain, Poland and the Eastern Front, 1939 Anita J. Prazmowska, 1987-07-23 This book offers a revisionist interpretation of British foreign policy towards Poland and the role of the Anglo Polish relationship during the period March September 1939 It challenges and questions hitherto held views on the British determination to defend Poland and oppose German expansion eastwards It includes a study of foreign policy economic policy and military planning This book is a major contribution to our knowledge of the outbreak of the war because it contains a unique and original study of the role of the Poles in British proposals for an eastern front and the Polish perception of their relationship with Germany Finally the inconclusive nature of British approaches to the Soviet Union and the Rumanian government are put into the context of the abortive proposal for an eastern front against Germany

The Eagle Unbowed Halik Kochanski, 2012-11-13 World War II gripped Poland as it did no other country Invaded by Germany and the USSR it was occupied from the first day of war to the last and then endured 44 years behind the Iron Curtain while its wartime partners celebrated their freedom The Eagle Unbowed tells for the first time the story of Poland s war in its entirety and complexity

British Policy Towards Poland, 1944-1956 Andrea Mason, 2018-11-19 This book examines the outcome of the British commitment to reconstitute a sovereign Polish state and establish a democratic Polish government after the Second World War It analyses the wartime origins of Churchill s commitment to Poland and assesses the reasons for the collapse of British efforts to support the leader of the Polish opposition Stanis aw Miko ajczyk in countering the attempt by the Polish communist party to establish one party rule after the war This examination of Anglo Polish relations is set within the broader context of emerging early Cold War tensions It addresses the shift in British foreign policy after 1945 towards the US the Soviet Union and Europe as British leaders and policymakers adjusted both to the new post war international circumstances and to the domestic constraints which increasingly limited British policy options This work analyses the reasons for Ernest Bevin s decision to disengage from Poland helping to advance the debate on the larger question of Bevin s vision of Britain s place within the newly reconfigured international system The final chapter surveys British policy towards Poland from the period of Sovietisation in

the late 1940s up to the October 1956 revolution arguing that Poland's process of liberalisation in the mid 1950s served as the catalyst for limited British reengagement in Eastern Europe

Britain and Danubian Europe in the Era of World War II, 1933-1941 Andras Becker, 2021-03-24 This book is a study of British official attitudes towards the Danubian countries Hungary Czechoslovakia Romania and Yugoslavia from Hitler's rise to power in 1933 to the year 1941 a period that marked serious but fruitless British political and economic efforts to unite this unruly part of Europe against Nazi ascendancy Set against an international backdrop of regional revanchist revisionist and irredentist tendencies particularly in Hungary and Bulgaria the book explores how these movements affected international relations in the region as they aimed to overturn the territorial order set down in Versailles following the Great War to restore the status quo of a more glorious national past Offering fresh insights into the British East Central and South East European relationship the book charts the shifts in British official policy towards Danubian Europe amidst competing regional nationalisms and the sudden and abrupt shifts in British global priorities during the early part of World War II

A Bibliography of British History, 1914-1989 Keith Robbins, American Historical Association, Royal Historical Society (Great Britain), 1996 Containing over 25 000 entries this unique volume will be absolutely indispensable for all those with an interest in Britain in the twentieth century Accessibly arranged by theme with helpful introductions to each chapter a huge range of topics is covered There is a comprehensive index

Poland's Protracted Transition Kazimierz Poznański, 1996 This book first published in 1997 offers an integrated study of institutional change in the Polish economy since 1971

The Origins of World War Two Robert Boyce, Joseph A. Maiolo, 2017-03-14 No issue in modern history has been more intensively studied or subject to wider interpretation than the origins of the Second World War A conflict involving three arguably four major aggressor Powers operating simultaneously but largely separately on two continents inevitably raises complex theories and debates Each participating power has its own history and each one must take account of various influences upon the behaviour of its soldiers and statesmen His wide ranging collection of original essays each by an international expert in their field covers all aspects of the subject and highlights the controversy that continues to characterise current thinking on the origins of the war Going beyond the usual Eurocentric approach Part I examines the roles of all seven of the Great Powers including Japan and the USA as well as the parts played by several of the lesser Powers such as Czechoslovakia Poland and China Part II contains chapters which explore key themes that cannot be fully understood within the context of any single country These themes include the role of ideology propaganda intelligence armaments economics diplomacy the neutral states peace movements and the social science approach to war Written in clear jargon free prose together these essays provide a comprehensive single volume text for students and teachers and are essential reading for all with an interest in the debates surrounding the causes of World War Two

Justice and the Genesis of War David A. Welch, 1995-08-10 Studies of the causes of wars generally presuppose a realist account of motivation when statesmen choose to wage war they do so for purposes of self preservation or self

aggrandizement In this book however David Welch argues that humans are motivated by normative concerns the pursuit of which may result in behaviour inconsistent with self interest He examines the effect of one particular type of normative motivation the justice motive in the outbreak of five Great Power wars the Crimean war the Franco Prussian war World War I World War II and the Falklands war Realist theory would suggest that these wars would be among the least likely to be influenced by considerations other than power and interest but the author demonstrates that the justice motive played an important role in the genesis of war and that its neglect by theorists of international politics is a major oversight
