British Business And Protection 1903 1932:

British Business and Protection, 1903-1932 Andrew Marrison, 1996 **British Business History, 1720-1994** J. F. Wilson, 1995-10-15 This is the first textbook that comprehensively covers the three centuries of British business history from 1720 to the present day Wilson argues that company culture has been the most important component in the evolution of business organisations and management practices The influence of business culture on firms structure sources of finance and the background and training of senior managers is investigated to show its pivotal importance in determining business performance **The Agrarian History of England and Wales** Edward John T. Collins, Joan Thirsk, 2000 The unifying theme of this volume is the changing role of the countryside in national life and the impact upon it of the social and economic forces unleashed by industrialisation and the growth of towns A New England? G. R. Searle, 2005 G R Searle s narrative history breaks conventional chronological barriers to carry the reader from England in 1886 the apogee of the Victorian era with the nation poised to celebrate the empress queen s golden jubilee to 1918 as the war to end all wars drew to a close

A New England? G. R. Searle, 2005-07-29 G R Searle s absorbing narrative history breaks conventional chronological barriers to carry the reader from England in 1886 the apogee of the Victorian era with the nation poised to celebrate the empress queen s golden jubilee to 1918 as the war to end all wars drew to a close leaving England to come to term with its price above all in terms of human life but also in the general sense that things would never be the same again This was an age of extremes a period of imperial pomp and circumstance with a political elite preoccupied with display and ceremony alongside the growing cult of the simple life the zenith of imperialism with its idealization of war on the one hand the start of the Labour Party a socialist renaissance and welfare politics on the other and a radical challenging of traditional gender stereotypes in the face of the prevailing cult of masculinity Under Professor Searle s historical microscope all the details of daily life spring into sharp relief Half forgotten figures such as Edward Carpenter Vesta Tilley and Sir Henry Campbell Bannerman take their place on stage beside Oscar Wilde the Pankhursts and Lloyd George Motoring and aviation to become such an intrinsic part of life within the next decades had their beginnings in this period as pastimes for the rich From the wretched slums of England s great cities to their bustling docks and factories from the grand portals of Westminster to the violent political challenges of the Ulster Unionists and the militant suffrage movement from Blackpool s tower and beach packed with holidaymakers to the trenches of the Western Front the energy creativity and often destructive turmoil of the years 1886 1918 are brought into focus in this magisterial history THE NEW OXFORD HISTORY OF ENGLAND The aim of the New Oxford History of England is to give an account of the development of the country over time It is hard to treat that development as just the history which unfolds within the precise boundaries of England and a mistake to suggest that this implies a neglect of the histories of the Scots Irish and Welsh Yet the institutional core of the story which runs from Anglo Saxon times to our own is the story of a state structure built round the English monarchy and its effective successor the

Crown in Parliament While the emphasis of individual volumes in the series will vary the ultimate outcome is intended to be a set of standard and authoritative histories embodying the scholarship of a generation

The British Industrial Decline Michael Dintenfass, Jean-Pierre Dormois, 2002-11-01 The decline of British Industry in the late Victorian and early Edwardian period is the subject of major concern to economic and modern British historians This book sets out the present state of the discussion and introduces new directions in which the debate about the British decline is now proceeding Among other themes the book examines the role of the service sector alongside manufacturing the distinctiveness of the British regions the state's role in the British decline including an analysis of its responsibility for the maintenance and modernization of infrastructure the association of aristocratic values with entrepreneurial vitality how British historians have discussed success and failure with a critique of the literature of decline

Languages of Politics in Nineteenth-Century Britain D. Craig, J. Thompson, 2013-10-24 A comprehensible and accessible portrait of the various languages which shaped public life in nineteenth century Britain covering key themes such as governance statesmanship patriotism economics religion democracy women's suffrage Ireland and India

The History of Anglo-Japanese Relations, 1600-2000 I. Nish, Y. Kibata, 2000-09-28 Volume II in this series of five volumes deals with relations between Japan and Britain in the poetical diplomatic sphere from 1931 to the present day From the political diplomatic standpoint it discusses the deteriorating relationship of the 1930s and leads on to the development of increasingly healthy postwar relations The book consists of parallel essays from Japanese and British academic specialists

Character, Ethics and Economics Peter Cain, 2018-09-28 This book is an examination of the concept of character as a moral marker in the later nineteenth and early twentieth centuries Its main purpose is to investigate how the character talk that helped to shape elite Britons sense of themselves was used at this time to convince audiences both in Britain and in the places they had conquered that empire could be morally as well as materially justified and was a great force for good in the world A small group of radical thinkers questioned many of the arguments of the imperialists but found it difficult to escape entirely from the sense of moral superiority that marked the latter's language

Churchill and Industrial Britain Jim Tomlinson, 2024-11-14 This book offers a new understanding of the main economic and political trends of 20th century Britain through the lens of Churchill's early career and approach to industrialisation Shedding fresh light on Churchill's political endeavours between 1900 and 1922 this study analyses his work within his political constituencies and highlights how he attempted to balance their local concerns with his larger imperial agenda Tomlinson guides readers through Britain's industrial challenges at the start of the twentieth century with a particular focus on the textile economies of Churchill's constituencies in Lancashire and Scotland and shows how industrial competition within the Empire exemplified the tensions between domestic economic policy and attempts at globalization and influenced Churchill's later politics Tomlinson acknowledges the role of the First World War in boosting the industrial output and bargaining power of countries within the Empire and analyses these alongside key moments in Churchill's early career

such as his defeat at Dundee and time at the Exchequer In doing so the author highlights the context in which Churchill's ideas on the politics and economics of Empire were first formed particularly in relation to the impact of imperial economic policy on British domestic prosperity Ultimately this book delivers a new assessment of twentieth century British economic history in the light of Britain's relationship to the Empire and the first great globalization
